Miss FLORENCE WETMORE.

INAUGURAL ADDRESS
OF
HON. JOSEPH L. WHITON
MAYOR OF QUINCY
MASSACHUSETTS

1917

MAYOR'S INAUGURAL ADDRESS.

Gentlemen of the City Council:

Our new City Charter, Plan A, Chapter 267 of the Acts of 1915 gives to the Mayor and City Council authority to reorganize the administrative departments of the city government. I believe it will be in the interest of economy and efficiency in the conduct of the city business to reorganize several of these departments and I request that you give attention to this subject at your earliest convenience.

I submit for your consideration the following recommendations concerning some of the departments:

Board of Assessors.

The Board of Assessors consists of a chairman and two associate members, each appointed for a term of three years, the chairman giving his entire time to the duties of the office, and the other assessors giving only a portion of their time. Under Ordinance No. 4 the Mayor is authorized each year to appoint an assistant assessor for each ward to serve from April 1st to the end of the year. The assistant assessors have heretofore reported to the board only the polls and the taxable tangible personal property in their respective wards.

It does not seem to me that the practice which has been adopted by the assessors in the past has enabled them to give to the duties of their office the careful attention and study needful for their proper performance.

It is of vital importance to the city that all property subject to taxation by it shall be taxed, and that it be taxed according to its just and fair cash value, so far as ascertainable by human judgment — no more, no less.

To ascertain the market value of all the taxable property of the city, in my judgment, is a task of such magnitude as to require the undivided and earnest attention of all the board for the entire year. I realize that the actual assessment work must be done between April 1st and September 1st, a period of only five months, but the remaining months of the year could well be spent to an advantage in the careful study of the different properties in the city, subject to taxation, to the end that each year's work may be as near the legal standard as possible.

I recommend that Ordinance No. 4, so far as it relates to the Board of Assessors, be repealed and a new ordinance adopted requiring the assessors to devote their entire time during the usual business hours of each working day to the duties of their office, and that full and adequate compensation be provided for them.

In view of the extraordinary condition which exists in our city today, owing to the valuations placed on the property of the city by the board of 1916, and the large number of abatements which we may reasonably expect will be requested by the taxpayers, and also to avoid a recurrence of such a state of affairs again, if such a thing can be conceivable, I recommend to the council an ordinance authorizing the Mayor to appoint assistant assessors for each ward, whose term of office shall begin in January and continue throughout the entire year. Each assistant assessor should

be charged with the duty of giving careful study to the cash value of all real and personal property taxable in his ward and be so informed as to the same that when the board comes to assessing the property in the ward it may have the benefit of the special study and attention he may have given the subject. Their services would also be of value in the event of a request for an abatement being made, because it seems to me that a request for an abatement of an assessment placed on property by the assessors, and sworn to by them as being a correct statement of the just and fair cash value of the same, should be carefully considered before action is taken thereof. The same care should be taken in the matter of making an abatement as was originally used in assessing the property.

The duties of the assistant assessors, if properly performed, should take a substantial portion of their time each year, and, so far as possible, they should all be experts and familiar with the value of the property in their respective territory. A proper and reasonable compensation should be provided for them.

Board of Health.

The one department of the city most closely allied with the health of the people, and yet the one about whose work they are the least informed, is the Board of Health. In my judgment, in importance it is second to none. The efficiency of the board spells much for the welfare of our citizens. Each year the work of the board increases, not only as a natural result of the normal growth of the city, but also from new local and State legislation. Last year the board expended approximately \$55,000; of this amount nearly \$23,000 was in connection with contagious diseases.

The law requires the board to consist of three members, one of whom must be a physician. The board today maintains a clerk in the office at City Hall and holds its meetings on certain evenings each month. I believe it would be better for the city to have the chairman of the board devote his entire time to the general supervision and direction of its work. He will then be in a position to see to it that the work is properly carried on and the many health laws and regulations of the city and State complied with. It is not enough to have a board which will perform its duty in a haphazard manner; all of its functions, from the collection of garbage and ashes to the more important ones, should be performed promptly and efficiently. An ordinance meeting these suggestions should be adopted and salaries commensurate with the duties of their office and the time required by each of them should be provided for the members of the Board.

Managers of Public Burial Places.

This Board now consists of six members, all of whom, except the secretary, serve without pay. I am advised that no member of the Board is at the City Hall regularly during office hours each day, and that the secretary attends to the duties of his office evenings. This is an important board. The convenience of the public requires that some official thereof should be accessible daily during the usual business hours at some convenient place. When people have occasion to consult this Board, it is usually during a period of bereavement and distress, and they ought not to be embarrassed by delays arising from the absence of an official of the Board. I recommend that the Board be abolished, and an ordinance be adopted creating in its place the office of Commissioner of Burial Places. The Commissioner should be required to have an office either at the City Hall or some convenient place where people could consult him during stated hours. A Commissioner, with a superintendent as capable and efficient as our present superintendent, Mr. Nichol, could perform the

duties of the present board in a much more efficient and satisfactory manner. A reasonable salary should be paid the Commissioner.

Law Department.

It is apparent that the duties of this department will be considerably increased under our new charter, particularly those pertaining to the purchase or taking of land for public purposes. I am advised that notwithstanding the city has been in existence since 1888, and during the intervening years many parcels of land have been taken by the city, an abstract of titles thereto has not been kept; while the title to the land in each case has been examined and passed upon by the city solicitor, or some one acting under his direction, no permanent record has been kept thereof. Section 30 of the present charter makes the keeping of such a record compulsory. Work of this character is more properly that of a conveyancer than that of a general legal practitioner. I, therefore, recommend that Ordinance No. 23 be amended so as to create the office of said conveyancer, the conveyancer to be appointed by the Mayor for a term of three years, his duty to consist of examining title to land the city may take for public purposes, or upon which the Woodward fund may make a loan, and to draw all legal papers connected therewith. Also to keep an abstract or record book thereof. His work should be performed under the direction and supervision of the city solicitor. The services of such conveyancer should be paid for either according to the work performed or by an annual salary.

There are several other departments about which I shall, in the near future, make some recommendations to you with a view of improving their efficiency. I refrain from doing so at this time, as I wish to make a more thorough investigation into the workings of these departments before forwarding to you my plans for effecting the improvements therein that I have in mind.

I am aware, gentlemen, that the changes I have suggested in these departments mean an increase in maintaining the same, but I believe the same principle holds true in a public municipal corporation as in a private one — an indifferent or incompetent official is expensive at any price. An enthusiastic, honest and capable official is well worth any salary at which his services can be obtained. I do not intend, knowingly, to appoint any other than the latter class to office.

Basement of Hall.

I find that there are seventeen department officials and boards, with their respective clerks, having offices in the basement of the City Hall. It seems incredible that a city of the size and importance of Quincy should require so many of its officials and boards to transact its business in a basement under such unhealthy conditions as exist in the basement of this hall. This condition of affairs should be remedied at once and other quarters provided for them. The reducing of the number of councilmen from twenty-three to nine will enable the council to transact its business in smaller quarters than formerly used. This will enable us to supply accommodations for some of these departments above the first floor of the hall. When these departments have been removed from the basement, the basement can be fitted up, made fireproof and equipped so as to be a very desirable place in which to preserve the records and archives of the city.

Deficit Bills.

I am advised that one or more of the departments have deficit bills amounting to many thousands of dollars. I regret that I am not in a

position to state the exact sum. In the department of the Commissioner of Public Works alone there are deficit bills amounting to over \$9000, how much I have been unable to learn. I cannot understand why any city official should have been permitted to have incurred indebtedness so much in excess of appropriations for his department. I can understand how, through either a clerical error or oversight, an appropriation might be exceeded by a small amount, but to incur deficit bills in such a large amount, to my mind, must mean either gross incompetency on the part of the official, or reckless disregard of the law of the State and city ordinances.

Chapter 719 of the Acts of 1913, as amended, provides in Section 16 thereof as follows:

"No department of any city or town shall incur liability in excess of the appropriation made for the use of such department except in case of extreme emergency involving the health or safety of persons or property, and then only by vote in cities of two-thirds of the members of the council."

Ordinance No. 38 of the city, as amended, provides as follows:

"Clause 4. The city shall not be liable for any contract unless at the time it is made there is an unexpended balance of the appropriation to which it is properly chargeable, and in determining said balance all prior contracts and purchase orders filed with the city auditor under Clauses 3 and 5 of this section, or certified under this clause or Clause 5, shall be deducted.

"Clause 7. . . . No such account, claim, bill or pay roll shall be approved by the city auditor unless at the time the indebtedness was contracted there was an unexpended balance of the appropriation to which it is chargeable. . . . Nor shall it be approved if not properly chargeable to the appropriation to which it ought to be charged and properly itemized; . . ."

I regret very much that the ordinance does not contain a penalty for a violation thereof.

The practice of department officials of exceeding their appropriations must cease. If the existing ordinance is not drastic enough to prevent it, then I recommend that either a new ordinance be adopted, or the present one be so amended that an official cannot exceed his appropriation without incurring personal liability in so doing.

These deficit bills of last year should not be charged against the operating expenses of this year, nor paid from this year's revenue. They constitute a part of the operating expenses for the departments for last year and should be charged against the revenue of that year, or some other method provided for their payment. Officials of this year should not be handicapped by large deficits in their departments when they take office.

In this connection, I think it proper that I should outline to you what policy I intend to pursue with reference to the claims for abatement which will probably be made by taxpayers on account of the valuations placed on their property last year by the assessors. As soon as may be, after the conclusion of these inaugural ceremonies, I intend to appoint a new Board of Assessors, and if you gentlemen will co-operate with me and pass the ordinance I suggest, authorizing me to appoint assistant assessors, I will at once appoint an assistant assessor for each ward. These men I shall then instruct to proceed to consider every case of an alleged overvaluation of property, and wherever it appears that the property of a taxpayer has been overvalued and an abatement sought, if it can be legally granted, the Board will be instructed to make such an abatement. In making these abatements, the Board will be governed solely by the law and their oath of office. No favor or favoritism will be shown, and unless a taxpayer is

justly entitled to an abatement it will not be granted. The assessors will be instructed to perform their duty irrespective of results which it may produce, fearlessly and conscientiously, to the end that justice may be rendered to every taxpayer. If any taxpayer is refused an abatement and he feels aggrieved, the courts will be open to him to assert his rights, and, if the claim is fair, there he will find a remedy.

I understand that a substantial portion of the \$41,000 raised last year to meet abatements has been expended. It is very probable that if any substantial number of abatements are made this year on account of last year's assessments, that a deficit will be created. If such a condition arises, it will be through no fault of this administration, and a fear of it ought not to deter us from doing our duty. The deficit, if any, will have to be provided for, and I believe we will find a way to do it.

Municipal Garage.

The city is the owner of many automobiles now in use in several of its departments. These automobiles are kept in different garages. I believe it would be economy for the city to construct a municipal garage in which all its automobiles can be kept and such repair work done thereon as may be necessary. The council of last year had this proposition before it and the matter was referred to the council of this year. I trust you will give this matter your prompt and favorable consideration.

Financial Statement.

I have asked the city auditor to prepare a detailed statement of the finances of the city. A copy of this statement will be furnished to each of you gentlemen. From it you will see that our financial condition is a serious one, and it will tax our combined ability to place the city on a sound financial basis. We must practice economy, but it must be economy with efficiency. We must not lose sight of the fact that our city is rapidly growing. A niggardly policy would retard its growth. We must strive to give to the city as consistently progressive a government as our resources will admit. We must be conservative, while keeping abreast of the times.

Gentlemen, while the problem that is before us may be a trying one, yet it is merely one that will require only so much more earnest and conscientious effort on our part. It is capable of solution, and I believe we will solve it satisfactorily to our fellow citizens. Knowing each of you gentlemen, personally, as I do, I know in advance that in what you believe to be for the best interest of the city I will have your hearty co-operation, and I feel you know me well enough to be assured you will, in like manner, have mine. Working together, giving our city the best there is in us, we may be certain our work will be appreciated and our administration of the city's affairs will meet with the approbation of the citizens of Quincy.

AUDITOR'S REPORT

Quincy, Mass., May 1, 1917.

To the City Councillors, Quincy, Mass.

In accordance with the ordinance of the city, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the city at the close of the financial year, December 31, 1916.

HENRY O. FAIRBANKS, *City Auditor.*

CITY OF QUINCY, IN COUNCIL.

Ordered,

March 14, 1916.

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the city of Quincy for the financial year beginning January 1, 1916, and ending December 31, 1916, to be expended by and under the direction of the several officers or boards as herein designated, in accordance with the provisions of Chapter 719 of the Acts of 1913.

That the appropriations for Water Maintenance and Clerical be paid from Water Receipts.

That the appropriation for Sewer Maintenance and Clerical be paid from Sewer Assessment Receipts.

That the sums herein appropriated, in the budget, are for the current running expenses of the departments and not for the purchase of automobiles.

REPORT OF INSPECTOR.

Daniel R. McKay, Chief of Police:

The following is my report for the year ending December 31, 1916, together with a report of the liquor transported by the licensed expressmen. As will be seen there has been quite a large increase in the amount of liquor handled by the expressmen this year, over that of last year. This is accounted for by an amendment to the liquor laws which forbids dealers from delivering liquor in a no license city. This liquor now has to be delivered by a licensed expressman, who must put it on his book, and make a report of it to the Police Department. The New York, New Haven & Hartford Railroad has also adopted a new rule, which was in effect all of the year, refusing to deliver liquor to any one but a licensed expressman, so that now we get a report of these carloads of wine and brandy which are ordered by certain co-operative associations, and which are distributed among the members according to their orders. I think if the liquors included in these items could be fixed and taken from the amount this year, we would find that less liquor has been brought into Quincy this year than last.

Sixteen licenses to transport liquor were granted by the City Council on May 1. One of the persons licensed gave up the business in July and one other was convicted on two complaints of illegal transportation and forfeited his license, so that we close the year with fourteen licenses in effect, the same as last year.

REPORT OF CAPTAIN.

January 1, 1917.

Daniel R. McKay, Chief of Police:

Following is my report for the year ending December 31, 1916. During the year I have carefully followed the requirements of the Police Manual relative to co-operation with outside departments, and have carefully followed the proper and usual custom in tracing stolen and lost property.

Investigations made, including those of Law Department and accidents.....	460
Value of stolen and lost property recovered.....	\$3,656
Rendition of fugitive from Fresno, Cal.....	1
Rendition of fugitive from Indianapolis, Ind.....	1

Respectfully submitted,

ALFRED W. GOODHUE, *Captain.***Conclusion.**

The year 1916 has been a busy one for the department, but fortunately without such serious outbreaks of crime as many Massachusetts cities and towns have had to cope with.

It is gratifying to me to note the effort on the part of almost every member to give to the citizens the best that is in them. The routes of the officers in most cases are very large and I feel they deserve commendation for the manner in which law breaking has been kept down.

The necessity of more signal boxes is more apparent every day, and I feel more should be installed with little delay. Two should certainly be installed at Squantum and two at Hough's Neck. There are day and night patrolmen at both these places and their only means of communication with the station at night is to arouse a resident for the use of their private telephone.

I suggest an increase in the number of patrolmen without delay, and I hope before long that this city will adopt the three-platoon system. The question of handling the ever increasing automobile traffic is one to be given serious consideration in this city. To every citizen, particularly in the warm seasons, it must be surprising that the number of accidents are kept down to the present numbers. This increase and the occasional speed fiend mean that we must, without delay, increase means of coping with it.

The day of the auto trap is gone and it never was a satisfactory means of proper detection and conviction. To properly take care of it more up-to-date means should be adopted now. I suggest the purchase without delay of an up-to-date motor cycle to regularly patrol our main thoroughfares. A motor cycle, operated by a uniformed officer, I believe will prove a wonderful means of handling this increasing traffic and soon drive out the speed fiend.

Again I ask that immediate and serious consideration be given the need of new quarters, and I believe it is not necessary to offer at this time other reasons than those given by a former Board of Health. As is well known, this old building was taken for its present use when there were fifteen members in the department, while today we are badly cramped with a membership four times larger. It is decidedly unfair to ask and expect men to occupy such sleeping quarters as we have for them.

At this time I wish to thank all officials with whom I have done business during the year for courtesies extended to me. I extend my thanks to His Honor, Judge Avery, Associate Judges Cook and Pratt for fairness in dealing with the department and to all the attaches of the court for kindly dealings, to the members of the press who have been eminently fair in surpressing news when for the best interest of the workings of the department, and to Dr. Ash, who as City Physician we found always ready and willing to answer our calls at any hour of the day and night, to the city clerk and his assistant for favors we are so often forced to seek in carrying out the duties of this office.

Respectfully submitted,

DANIEL R. McKAY, *Chief of Police.*

PUBLIC BURIAL PLACES.

To His Honor, the Mayor of the City of Quincy;

In accordance with the provisions of the city charter, the Board of Managers of Public Burial Places submit their annual report.

The board organized on Monday evening, February 7, 1916, with every member present, and elected Frederick F. Green, chairman, and Dr. Alfred H. Gilson, secretary.

The board found that while the department had been doing its work in a way that might have been suitable some years ago, it was not in accord with the requirements of a city the size of Quincy. Those who have served on previous boards should not be criticized for this condition, for there are few citizens who can give or are even willing to give gratuitously of their time, especially in these days of hustle, that public business may be transacted on up-to-date business lines. Every citizen should do his duty of citizenship, no matter how small the shares. If each did his part, besides reducing the burden of taxation, we would all know more about municipal government, and would have to depend less on the advice and word of incredulous politicians when selecting public officials.

The duties of this office are divided into two parts: first, the office, or clerical, and second, the management of the two public burial places belonging to the city. We will treat of these parts separately, the better that the citizens may understand them.

The Office, or Clerical Part.

It is in the office that the general clerical business is done, and it is surprising to see how few there are who realize that there is plenty of work to do if one really wants to do it in a department in which the business is of such a serious nature. No successful business man can get along without advertising, and neither can a cemetery be made to look attractive or be successfully managed without advertising. Not that there are any bargains to be offered to attract patrons, but that before bereavements make it obligatory, we may select a suitable place of burial, and while we yet live, so place it that it will always receive care and attention to the last day. That your board did advertise this year is evidenced by the fact that many more lots were placed under the care of the departments than in any previous year. The advertisement consisted of sending through the mails to about fifteen hundred of the lot owners a carefully worded circular in a sealed envelope, with a return addressed postal card contract. It brought results which added considerably to the expenses of the department, while the increased revenue was of no advantage to us. The extra work caused a great deal of anxiety to the board over the elasticity of its budget. The circular referred to the proposition of placing lots under perpetual care, and solicited letters of inquiry. This also brought results which caused a considerable increase in letter writing, and a record in amount added to the perpetual care fund; thus \$4350 was paid into the city treasury as trustee, and no greater sum has ever been added in any previous year.

The care of these lots made necessary an imperative innovation in the old system, which had caused unlimited complaint, and at best had served its usefulness. Like all new ideas, it was no easy matter to substitute them for the old, and it will take at least another season to reap the full results. The system inaugurated is simple, and admits of informing any one of the date on which their lots have received attention, and it also serves the purpose of an inexpensive system of office supervision. The system consists of a duplicate set of cards, one for the office, and the other is given to the superintendent. Every lot under care is represented by a card, and from a daily time sheet the dates returned by the superintendent of the care given are transferred to the respective cards in the office. There is nothing wrong with this system, and another year will prove its worth, and more satisfactory results.

Records are considered by those who work upon them as being of inestimable value, and by those unfamiliar with them, as being a waste of time, space and work; but how pleased are this latter class when, upon entering an office, they find in a convenient and easy form just the information they had been searching for. There are, somewhere in the office of this department, incomplete yet valuable records, but in such form that it is with great difficulty anybody is able to use them. During the past year the board has devoted much time to gathering some of these records, so that they will be easy of access, and available for all interested. Only a start has been made, but enough has already been done to show that the work is worthy of a continuance. Under the law certain records must be kept in books, and that law has been complied with, but the more convenient form of a card system has been adopted for office and general use. An account card has been opened with each lot, serviceable for a period of eight years. These are arranged by lot numbers. A smaller card index for these account cards has been arranged and entered under the names of all those who have at any time had any business dealings with the lots. These cards are arranged in alphabetical order, thus we have all the lots in Mt. Wollaston Cemetery so arranged that the owners can be located with but little trouble.

Requests are frequently made for copies of deeds to lots, but such a thing has been impossible to give, as no copies were kept, and few are recorded. It is proposed in 1917 to remedy this and to place, as far as possible, a record in a proper deed book of every lot in Mt. Wollaston Cemetery. This system was begun this year with the Perpetual Care Deeds.

Twenty years ago the board talked over the question of a plan book of all the lots in Mt. Wollaston Cemetery, but there is nothing in the office to show that this valuable and necessary book was ever started, and much information that such a book would give is now furnished from private sources. It will probably cost the city a goodly sum to get this information some day. During the past year this information has been kept, and thus a beginning has been made in the records of the office. There are about eight thousand burials in Mt. Wollaston Cemetery, and with much tedious work, patience and lost time it would be possible to give an inquirer information concerning any one of them. The method has served its time, and while obliged by law to continue this old system of keeping a register, the department has introduced a card system which when completed will prove of great value, and make accessible information which is frequently being sought. This work should be continued each year until the records back to the year 1856, when the first burials were made, are in this convenient card system.

Mt. Wollaston Cemetery.

This has been a most successful year so far as the management of this cemetery is concerned. More lots were cared for during the year 1916 than in any previous year. This has been a severe tax upon the working force as the limited appropriation made it impossible to add to the number of men employed. It meant simply crowding in the care of two hundred more lots upon a force of men who were already worked practically to their capacity under present methods. The season was very moist, and it was almost impossible to keep ahead of the grass, and other work that should have been done had to be postponed. There is an excellent chance in Mt. Wollaston Cemetery for many up-to-date improvements and methods, and when these are adopted, the cemetery will bear the inspection and comparison with any in greater Boston. There is much need of a new set of rules, as the present ones were adopted in 1897. There has been a lack of enforcement of these rules, so that perhaps a new set might be the means of bringing better results, as they would define more plainly just what can be placed on lots, and can be done in the cemetery. At present some sections of the cemetery look more like the display yard of a monumental dealer than a place of burial. Proper rules and their enforcement would prevent this. The use of wooden boxes with glass fronts, enclosing metallic wreaths or flowers has been stopped, as they soon get out of repair and become unsightly. This was done by direct orders of the board, although the rules were sufficiently strong to prevent their advent into the cemetery.

The appearance of the entrance to Mt. Wollaston Cemetery is not at all what it should be. It has never looked right. The new part added by changing the location of Sea Street looks more like a piece of neglected pasture land. Something should be done the coming year to change these conditions.

It is proposed by the Planning Board to extend Greenleaf Street through the cemetery to Sea Street as a part of their general system of boulevards. If this is done it will divide the cemetery, unless a detour is made around the extreme end of the land owned by the city. This may be the best solution, as many of our boulevards are made more beautiful by winding roadways. If this plan is not feasible, then we recommend that the tract of land which will be left on the northerly side of the new boulevard should be reserved for a chapel and main plant of the cemetery.

At an early date plans should be secured for a chapel for this cemetery. The chapel building should include an up-to-date office with waiting rooms and all modern conveniences.

There are two ponds in the cemetery, and they can be made attractive. Left as at present, they are breeding places for mosquitoes and disease. They should be properly walled and kept filled with fresh water after being placed in good condition.

The following table shows the number of lots under care in Mt. Wollaston Cemetery yearly since 1905. It is deemed best to print this table that lot owners may be encouraged in this good work, and with the hope that the number may increase each year until all are under special care. The price is reasonable, and should be kept so, as it is the duty of the city to do its share in making the cemetery look beautiful.

Lots Cared for Since 1905.

	<i>Yearly</i>	<i>Perpetual Care</i>	<i>Total</i>
1905	410	158	568
1906	415	175	590

1916	782	353	1135

Hancock Cemetery.

It is needless for us to mention any of the historical interests that center around this old burying ground. For years it has gone neglected except for the care it might receive about Memorial Day, and the possibility of a fall clean-up, provided sufficient money remained in the appropriation.

A fund of \$3000 was left by the late Charles E. French, the income to be spent for the care of this cemetery. This fund ought to produce a yearly revenue of at least \$120, which is a fair sum for a start.

The department has for the first time succeeded this year in having three of the lots placed under perpetual care, and the revenue from these will add about \$17 more, thus making a total of \$137 to expend. The sum is not a large one, but during the past year it has enabled the employment of one man to daily gather the old rubbish deposited there. The paths have been kept clear of weeds, and another year should show a decided improvement.

Through the hearty co-operation of Mayor Bates and the city council the department was provided with \$1475 to restore the wall and iron fence along the line of Hancock Street. This work had been postponed for many years, and makeshift repairs seemed to be the limit of the city's interest. When the present board took office they found that it was proposed to dispose of the old iron fence, and rehabilitate the wall to a modern affair. This would forever be a disgrace to the city and would show that we of this generation cared little for the historical burying ground of the old Quincy families. Plans for this work were drawn by the engineering department of the city. Delays were caused in beginning the work, as owing to the increased cost of labor and material it was necessary to get a sufficient sum of money to complete the job before any contract could be made. When a sufficient sum was appropriated, sealed proposals were called for by advertisement in the *Quincy Telegram*, and bids were received as follows:

The Pinel Tool Company, wall and fence complete.....	\$1,273.85
John R. Richards, capping for wall \$4 per lineal foot, delivered; for setting capping and straightening wall, 50 cents per cubic foot; drilling holes 5 inches deep, 30 cents each (200 lineal feet in wall)	
Norfolk Iron Company, fence, gates and arches, complete.....	990.00
Alexander Kenn, wall complete.....	600.00
The Pinel Tool Company, extra, pean hammer, cap stone.....	50.00

The bids were opened in the presence of four members of the board, and it was unanimously voted to award the contract to the Pinel Tool Company, they being the lowest bidder. The original bids called for the capstone to be fine pointed. This was thought by two members of the board familiar with granite work to be in bad taste, and as there were sufficient funds, it was decided before awarding the contract to ascertain the cost of pean hammered and four-cut face, and upon the recommendation of the above-named gentleman it was decided to have it pean hammered at an additional sum of \$50, making the entire contract, which includes everything about the work, \$1323.85.

The old capstone had to be removed at the expense of the department, and after being cut into proper lengths it was taken to Mt. Wollaston Cemetery, where it will be finished into boundary posts, thus adding revenue to the city. It was found when the old capstone was removed that only part of the wall was solid granite, and without any instruction from the department and no way to compel it to be done, the Pinel Tool Company of their own accord and free will, have filled the wall with concrete, thus making it solid and preventing the sliding out of the wall in the future. The department, in behalf of the city, extends its thanks to the Pinel Tool Company for this act, which recommends them for fair dealing with our city, a thing which others in similar instances might copy.

An instance in connection with this work shows at least a reverential feeling for the old resting places of the dead, by our citizens of foreign birth. Those who relaid the wall were born in a foreign country, and a passerby heard the boss workman remark to a laborer who was about to break off an end of a piece of granite, "Don't you do that. This is the wall of an old cemetery, and every piece must go back as it was first placed here." This is a lesson for all of us to remember.

The department suggests that as this wall and fence were first made possible by the ladies of the First Unitarian Church, and were appropriately dedicated when completed, that proper rededication exercises be held under the direction of the ladies of that church at some time after the work is finished.

As the town fathers agreed when this cemetery was presented to the town to always keep it properly fenced in, it is our duty, and out of respect to that promise, to see that proper enclosures be erected on the north and south sides and that the fence along the railroad track be put in proper repair. Something should also be done to prevent the accumulation of cinders at the rear part of the cemetery. This matter ought to be taken up with the Law Department of the city, to try and devise some way of abating this nuisance.

Perpetual Care.

This subject is one that should interest all lot owners and should be considered while they are still alive and able to make suitable provision for the care of their lots to the last day. Where the owners are unable to assume the whole expense, they should interest those who will later succeed them, to assist in making a deposit of the necessary amount. There has never been a year when the fund has made such an increase as this, and the department has been called upon to give information to many who have the matter still under advisement. All this has been brought about by the circular letter referred to previously in this report. If the work along this line is continued, there ought to be a decided increase the coming year.

We have found that people have complained at the lack of care these lots have received, claiming that the yearly care system has brought

better results. We have met these complaints by explaining the new card system of office supervision, and assuring the owners that better results would be shown in the future. The city must realize that the methods of doing business of a generation ago, even in a cemetery, will not meet the demands of the people of today. If this fund is to grow, the city must do its part to give the proper care and that means more than they have in the past.

For the information of administrators or executors of estates of deceased persons, under the laws of Massachusetts, they have the authority to provide for perpetual care of a burial lot.

A statement of the Perpetual Care Fund is attached to this report for the first time, and we believe it should appear each year, as the best protection to the fund is publicity.

We are going to suggest that the fund for perpetual care in the Hancock Cemetery should be kept as a separate account, so that the income will be devoted to the cemetery for which it is intended. It will be noticed that the income of the fund for the first time since it was established shows a falling off. This is not through any fault of the board of managers, but is entirely due to a system adopted some few years ago, and which should be corrected when future investments are made. The loss of this income was a serious one, for with the increased expenses brought about by the advance in the cost of labor, and all supplies, as well as the increased number of lots cared for, it made it a difficult matter to keep within our appropriation.

Some uniform system of price should be adopted for placing lots under perpetual care.

It is with much pleasure that we call attention to the various incomes of the department, as they show a decided increase over previous years. In some of the branches the increase was a natural one, but in the others it was brought about by the introduction of up-to-date business methods.

The board had under consideration the matter of reserving a certain section of the cemetery where the lots would be sold with perpetual care, and we recommend this for the consideration of our successors. This would also mean the reservation of a portion of the single grave section under the same condition.

The experience of the board has brought us to conclusions which we offer as recommendations. The Burial Department of the city has outgrown its form, which has existed for over forty years, and which was handed down from the town government, and incorporated in our city charter. It is largely this old form that is responsible for the lack of records, as well as the modern ways of doing business. No business man expects efficient work unless he has a department under permanent and competent employees, and why should a city believe it will get good results without adopting such methods? This department has grown to be one of importance. It has the expenditure of practically \$10,000 annually, and the preservation of records of great value. The business has been done without a close adherence to the law, and some of the lot owners have been given deeds that are valuable only for the paper upon which they are printed.

Under former methods information cannot be furnished that is reliable, as some of the facts are in writing, while others that make these of value are not. Persons having business with the department should have a permanent office to go to, where they may receive civil, courteous and prompt service, and their requests be attended to according to modern business methods. In consideration of the conditions that exist, the board recommends that a permanent office be established, and that the office of secretary be made permanent. We further recommend that the member-

ship of the board be reduced to three instead of six, as at present. It is almost impossible to get six members of an unpaid board to devote much time to an important office, unless there is an opportunity of frequently appearing in the limelight, and the chance of such publicity is not very promising in a department where all matters are of a serious nature. This change was considered very carefully during the latter part of the summer, and was talked over with some of the city officials. The secretary of the board receives a salary of \$300 per year, and a clerk is paid \$156, thus about one-third of the amount necessary for a permanent officer is being annually paid. The additional expense to the city would prove to be a profitable investment for the services rendered.

It was also considered that the board should be composed of five members, but in either case it was agreed that the membership should be so arranged that but one member should retire each year, thus giving a permanent unpaid board, with a permanent officer to conduct the business of the department.

For the first time the city has received some income for the care of single graves. This has been a matter from which employees have reaped the benefit in the past. Now that the department cares for single graves for the season at the expense of one dollar, there ought to be many more cared for.

The department was obliged to enforce the rule which prevents bands of music from entering the cemetery, because of the crowd that follows and tramples over the lots surrounding where the interment is to be made.

The general statistics and financial report of the department are attached.

The city has been very fortunate this year in having as the secretary of this board a person who was interested in and an expert on card systems, and to him belongs much of the credit for the establishing of a fine system of records which should be constantly added to until all the back years are included in it.

An appropriation was made to be expended by the city engineer in making a new plan of Mt. Wollaston Cemetery. This will be of great assistance to the department, particularly when sectional copies are made for office use. The present patchwork system of numbering the lots by sections ought to be abandoned, and we know of no better time than now. There has been no system about the numbering of the lots in this cemetery, which was due entirely to the careless method in use, but to completely correct it would involve much extra work, and a possible amount of confusion.

A large tract has been graded this year, and laid out in new lots. It might be a good plan to reserve this section for perpetual care lots.

For a long time the question of enclosing Mt. Wollaston Cemetery has been under consideration. Every year its need becomes more imperative. We hope that the city will not wait until the work of vandals makes immediate action necessary. The board suggests that some suitable stock design of iron fence be selected, and that \$1,000 be appropriated each year, until the whole cemetery is enclosed.

The board extends its thanks to Mayor Bates and to the members of the City Council for their hearty co-operation during the entire year, and in behalf of the employees of the department their thanks are extended to Mayor Bates for the increase in pay to \$2.50 per day and the Saturday half holiday made early in the season, and also to the general order on file in the office increasing the pay to \$2.75 per day on and after December 21, 1916.

The pay of the superintendent was increased \$10 per month and is now \$1200 per year. This was done in accordance with the general increase of the other employees of the department.

Included in this report are a few extracts from the Revised Laws which everybody should carefully read. This information is frequently requested from the department, and its publication will correct some of the erroneous information which now prevails.

Extracts Revised Laws.

Section 26 of Chapter 78: Lots in cemeteries incorporated under the provisions of Section 1, tombs in public cemeteries in cities, and lots and tombs in public cemeteries in towns, shall be held indivisible, and upon decease of a proprietor of such lot, the title thereto shall vest in his heirs-at-law or devisees subject to the following limitations and conditions:

If he leaves a widow and children they shall have the possession, care and control of said lot or tomb in common during her life.

If he leaves a widow and no children she shall have such possession care and control during her life.

If he leaves children and no widow, they shall have in common the possession, care and control of such lots or tombs during their joint lives, and the survivor of them during his life.

The persons in possession, care and control of such lots or tombs may erect a monument and make other permanent improvements thereon.

The widow shall have a right of permanent interment for her own body in such lot or tomb, but it may be removed therefrom to some other family lot or tomb with the consent of her heirs.

If two or more persons are entitled to the possession, care and control of such lot or tomb, they shall designate in writing to the clerk of the corporation, or, if it is a tomb or lot in a public cemetery, to the Board of Cemetery Commissioners, if any, or to the city or town clerk, which of their number shall represent the lot; and in default of such designation, the Board of Trustees or directors of the corporation, the Board of Cemetery Commissioners, if any, or the Board of Health, if such lots or tombs are in public cemeteries, in cities or towns, shall enter of record which of said persons shall represent the lot during such default.

The widow may at any time release her right in such lot, but no conveyance or devise by any other person shall deprive her of such right.

Section 28 of Chapter 78: A wife shall be entitled to a right of interment for her own body in any burial lot or tomb of which her husband was seized at any time during coverture, which right shall be exempt from the operation of the laws regulating conveyance, descent and devise, but which may be released by her in the same manner as dower.

Section 29 of Chapter 78: A husband shall have the same rights in the tomb or burial lot of his wife as a wife has in that of her husband, and may assert or release the same in the same manner as she may assert or release her rights.

Where the lot is not bequeathed in the will, or where there is no will, it descends to the heirs-at-law of the deceased owner, who are (Rev. Laws, Mass., Chap. 133, Sect. 1):

1. Children, and issue of any deceased child.
2. If no issue, then his or her father and mother.
3. If no issue nor mother, then his or her father.
4. If no issue nor father, then his or her mother.
5. If no issue and no father nor mother, then his or her brothers and sisters, and children of any deceased brother or sister.

6. If no issue and no father, mother, brother nor sister, then next of kin.

From the above it can be seen that the Massachusetts laws require that the title of a lot shall be vested in the name of a living individual.

Heirs are requested to immediately comply with this State law after the death of a lot owner. Otherwise delays may occur in determining whether interment orders are properly signed. Application for necessary documents in blank form may be made at the department office in City Hall.

Comparative Statement of Expenditures and Incomes for Expenses of Department.

This has been a busy year for this department, and our report is a lengthy one. The many improvements made in the management require that the citizens should have knowledge of them. Let us call your attention to this fact that had the department done nothing they would have nothing to report.

Very respectfully,

FREDERICK F. GREEN, *Chairman*,
 ALFRED H. GILSON, *Secretary*,
 ARTHUR B. HULTMAN,
 HAZEN E. RICKER,
 ALEX. W. RUSSELL,
 JOSEPH H. VOGEL.

REPORT OF OVERSEER OF POOR.

Quincy, Mass., January 1, 1917.

To His Honor, the Mayor of the City of Quincy:

The Overseer of the Poor, in compliance with the city ordinances, respectfully presents his report for the year ending December 31, 1916.

The department has handled 358 cases this year, of which number forty-six cases were aided under Chapter 763, Acts 1913, an Act to Aid Mothers with Dependent Children, which in many cases means almost entire support.

On August 13, 1916, sixteen cases, being aided in other cities and towns and having settlement in Quincy, lost their settlement in Quincy under Chapter 669, Acts 1911; of these, nine cases were being aided under Chapter 763, Acts 1913.

The high cost of living has seriously affected the department and increased the expenditures of the same.

The Associated Charities, other societies and individuals have co-operated splendidly in making the work of the department constructive as well as helpful.

A detailed report of the cost of the almshouse and outside poor will be found in the following statement.

The following is the financial statement for the year:

Appropriation.....	\$22,000.00
Balance from 1915.....	2,503.69
Johnson Fund.....	80.80
Transfer.....	3,500.00

Visits to outside poor	320
Office calls	50
Childbirths	5
Vaccinations	18
Visits to police station	20
Deaths at City Home	2

Respectfully submitted,

JOHN H. ASH, M.D., *City Physician.*

REPORT OF FIRE DEPARTMENT.

January 1, 1917.

Hon. Joseph L. Whiton, Mayor,
Quincy, Mass.

Dear Sir: I have the honor to submit the annual report of the Quincy Fire Department for the year ending December 31, 1916.

ORGANIZATION.

The department consists of the chief, three assistant chiefs, one permanent captain, one permanent lieutenant, one permanent superintendent of fire alarm, and thirty-five permanent firemen, also thirty call men.

Chief — Faxon Billings.

Assistant Chiefs — Frank C. Packard, Louis K. Badger and Albert E. Stephenson.

Captain — Alfred L. Mead.

Lieutenant — John J. Faircloth.

Superintendent of Fire Alarm — William A. Gavin.

Permanent Men — Frank Genero, James Connell, Herbert Griffin, William Carroll, Michael Scully, William Lahey, Richard Williams, Michael Barry, John Desmond, Edward Barry, Murdock McDonald, Myles Creamer, John Deneen, Charles Anderson, Andrew Scully, Daniel McNiece, James Gallagher, Richard Callahan, William Sands, Daniel Radley, William Gerry, James Dillon, Richard Joyce, Henry Hughes, John O'Neil, Charles Litchfield, Edward Lane, Christopher Oliver, Edward O'Neil, Faxon Billings, Samuel Tutton, Edward Farrell, Frank O'Brien, John Minnihan, John Curry.

APPARATUS.

Central Station.

One steam fire engine with tractor; one auto combination ladder truck; two auto combination hose trucks; one chief's car; two spare hose wagons and one bobsled.

Wollaston Station.

One combination ladder truck, horse drawn; one combination hose wagon, horse drawn.

Atlantic Station.

One auto combination hose truck.

West Quincy Station.

One ladder truck, horse drawn; one hose wagon, horse drawn.

Quincy Point Station.

One combination hose wagon, horse drawn.

Hough's Neck Station.

One combination hose wagon, horse drawn.

HOSE.

Number of feet of hose in this department, 13,650, of which 4000 feet are in poor condition.

HORSES.

There are seventeen horses in the department.

ALARMS.

During the year there have been 376 alarms.

Bell alarms, 144.

Still and telephone alarms, 232.

Out of this number 42 were false alarms.

The Central Station responded to 267 alarms, laid 15,100 feet of hose, raised 1228 feet of ladder and used 2440 gallons of chemicals.

The Wollaston Station responded to 83 alarms, laid 2950 feet of hose, raised 495 feet of ladders and used 524 gallons of chemicals.

The Atlantic Station responded to 130 alarms, laid 9700 feet of hose, raised 148 feet of ladders and used 291 gallons of chemicals.

The West Quincy Station responded to 70 alarms, laid 6550 feet of hose, raised 920 feet of ladders, and used 254 gallons of chemicals.

The Quincy Point Station responded to 58 alarms, laid 6400 feet of hose, raised 90 feet of ladders, and used 778 gallons of chemicals.

The Hough's Neck Station responded to 15 alarms, laid 3200 feet of hose, raised 24 feet of ladders, and used 41 gallons of chemicals.

Total number feet of hose laid, 43,900; ladders raised, 2905 feet; and 4328 gallons of chemicals used.

Hydrants in use $33\frac{3}{4}$ hours.

PERMITS AND LICENSES.

There have been 1675 permits and licenses issued from this office during the past year.

INSPECTIONS.

The usual number of inspections of garages, buildings, cellars and yards have been made this year.

VALUATIONS, INSURANCES AND LOSSES.

Total value of property involved	\$490,350.00
Total insurance on same	265,000.00

LOSSES.

January	\$1,130.50
February	12,964.95
March	6,417.75
April	1,300.00
May	11,334.95
June	55.00
July	1,200.50
August	25,007.00
September	1,155.00
October	2,338.00
November	3,046.00
December	163.00
	<hr/>
	\$86,112.65

JANUARY 1, 1917, INVENTORY OF FIRE DEPARTMENT.

<i>Central Station:</i>	
One steam fire engine with tractor	\$9,500.00
One auto combination hose truck	
One auto combination ladder truck }	10,600.00
One auto combination hose truck	5,500.00
One chief's car	1,000.00
<i>Atlantic Station:</i>	
One combination auto truck	6,000.00
<i>Wollaston Station:</i>	
One combination hose wagon	2,000.00
One combination ladder truck	2,000.00
<i>West Quincy Station:</i>	
One ladder truck	1,800.00
One hose wagon	700.00
<i>Quincy Point Station:</i>	
One combination hose wagon	2,500.00
<i>Hough's Neck Station:</i>	
One combination hose wagon	2,000.00
Fire alarm	17,000.00
Horses, hose and all other personal property	22,000.00
	<hr/>
Total	\$82,600.00

RECOMMENDATIONS.

I would recommend that not less than 3000 feet of fire hose be purchased at an early date, and that we add more motor apparatus to the department in place of buying new horses; also that the City Council take up the rebuilding of the fire alarm system, which was passed by the 1916 City Council, but failed to receive the Mayor's signature.

In conclusion, I wish to thank the city officials who have helped me in any way the past year, and I also wish to extend my thanks to the members of the Quincy Fire Department.

Respectfully submitted,

FAXON BILLINGS, *Chief Engineer Fire Department.*

REPORT OF CITY CLERK.

I have the honor to submit the twenty-eighth annual report for this department, being for the year ending December 31, 1916.

RECEIPTS.

Licenses.

AUGUST N. WEEDEN, *Collector of Taxes.*

SEALER OF WEIGHTS AND MEASURES.

Hon. Joseph L. Whiton, Mayor,
Quincy, Mass.

Sir: Complying with your request, I beg to submit the following report of the Department of Weights and Measures for the year ending December 31, 1916.

Testing and Sealing.

During the year just closed the work of this department has increased as it did in former years, due to the number of new stores, shops, etc. In order to perform this work it is necessary to carry a number of weights, tools and measures to seal and adjust all kinds of measuring and weighing devices. As this transportation is an expense I would recommend that the city purchase an automobile for the use of this department, with efficiency and economy in view.

Testing and Reweighing Packages.

This line of work has been carried on as in former years, and good results have been obtained. I find the merchants are willing to co-operate at all times and I have been received very courteously. The number of packages reweighed and found over or under as the case might be did not mean there was any great loss to either the purchaser or dealer, as the sealer checks his reweighings, no matter how small or large the weight indicates, when it is not absolutely correct. The amount in either case leads me to believe that the merchants of our city try to be honest in their dealings with the public in what they purchase.

Hawkers and Pedlars.

This line of work has increased, as the State Department has taken a great interest in the same since assuming charge of that department. They recommend a frequent inspection of scales, measures and licenses used by those engaged in this line of work. The local ordinance in force in this city in regard to the fee makes it \$2, and this, in my mind, is too small, and it is not only the lowest in this part of the State but the lowest of all surrounding cities. I would, therefore, recommend that the City Council amend the ordinance to increase this fee and thus increase the revenue to the city.

Ice.

A great deal of attention has been given to the test weighing of ice and the inspection of ice scales used on teams, and as a result two drivers of teams were summoned into court, convicted and fined for giving short weight in the sale of ice. If the public would co-operate with this department and make complaints it would assist the sealer in getting better results. If, instead of notifying the manager of the ice company whose drivers they had reason to believe were giving incorrect weight, it would notify this department investigations would be made at once. Complaints are considered strictly confidential.

Reweighing of Coal.

During the year twenty-seven teams were held up while in transit, certificates examined and the loads reweighed, amounting in all to 99,030 pounds. Ten loads were found correct and nine were found over, the amount being 445 pounds. Eight loads were found under, the total amount being 460 pounds. Of these loads found incorrect the weighers were notified immediately, and satisfactory explanations were given in each case. Most of the differences occurred on account of the tare of the teams and not with intent to give short weight. In the sale of coal by bags I find the full weight of twenty-five pounds given and the law being lived up to in every case. Also in the marking of the bags.

The receipts and disbursements of the department for the past year together with the tables showing the work done are included in this report.

I wish to take this opportunity to thank all with whom I have had dealings during the past year and trust future relations may be as pleasant.

Report of Court Cases.

Short weight of ice — five complaints. Conviction.
 Peddling without license — two complaints. Conviction.

Respectfully submitted,

JAMES M. CANTFILL,
Sealer of Weights and Measures.

ASSESSORS' REPORT.

Quincy, Mass., January 1, 1917.

To His Honor the Mayor, and the City Council:

Gentlemen: The following is respectfully submitted as the report of the Assessing Department for the year 1916.

Valuation.

The valuation of the city, April 1, 1916, as determined by the assessors, follows:

Value of land.....	\$27,533,725.00	
Value of buildings.....	24,825,575.00	
	<hr/>	
Total.....		\$52,359,300.00
Valuation of personal property other than bank stock separately assessed.....	\$10,161,450.00	
Valuation of National Banks located in and taxable in the city of Quincy.....	87,480.00	
	<hr/>	
	\$10,248,930.00	
Total valuation of the city as determined April 1, 1916.....		\$62,608,230.00
Amount to be raised by taxation.....	\$1,099,153.55	
Tax rate.....	17.20	
The valuation was also increased by omitted assessments levied in December, 1916.		\$180,900.00
The total valuation of the city upon which taxes were assessed, for the year 1916 when all assessments had been made was.		\$62,789,130.00

Valuation by Wards.

(Not including valuation of bank stock.)

	<i>Personal</i>	<i>Real Estate</i>	<i>Total</i>
Ward 1.....	\$4,626,450.00	\$14,492,525.00	\$19,118,975.00
Ward 2.....	1,977,025.00	7,719,025.00	9,696,050.00
Ward 3.....	624,150.00	5,080,575.00	5,704,725.00
Ward 4.....	398,675.00	3,929,875.00	4,328,550.00
Ward 5.....	1,635,150.00	11,261,100.00	12,896,250.00
Ward 6.....	900,000.00	9,876,200.00	10,776,200.00
	<hr/>	<hr/>	<hr/>
	\$10,161,450.00	\$52,359,300.00	\$62,520,750.00

The polls returned by the assistant assessors and those registered for the year, amounted to 12,687.

The assistant assessors who served during the year were: John A. Weeden, Ward 1; Samuel Castleman, Ward 2; Arthur G. Pinel, Ward 3; John Evans, Ward 4; Clark G. Boynton, Ward 5; William E. Barnes, Ward 6.

Summary from Table of Aggregates.

Resident property owners.....	8,587
Non-resident property owners.....	2,655
Poll tax only.....	12,687
Number of horses assessed.....	960
Number of neat cattle and cows.....	689
Number of dwelling houses.....	8,453
Number of acres of land.....	6,675

Respectfully submitted,

Assessors of the City of Quincy.

REPORT OF PARK COMMISSIONERS.

Quincy, Mass., January 29, 1917.

To His Honor, the Mayor:

Dear Sir: The Board of Park Commissioners herewith respectfully submits the following report, together with certain recommendations which it offers for the consideration of the new board.

The appropriation allowed to be expended under the supervision of this department was somewhat in excess of that appropriated in other years. We feel, however, that the amount of the park appropriation should be still further increased to successfully cope with the demands of this department.

We especially urge an appropriation for a topographical survey of Merrymount Park, and for a definite plan of development for the guidance of future park boards.

Merrymount Park.

The long felt want of a locker building for the upper field and oval was realized during the past year in the form of a handsome terra cotta bungalow style of building, which also adds beauty to the front entrance to the park. Owing to the insufficiency of the money appropriated for the purpose of erecting this dressing building the matter of the inside finish had to be put over until this year. We hope that the new board will take this matter up at its earliest convenience and have the building ready for use as early as possible.

The parkways in the various parts of the park are in bad need of repair and the ever-increasing automobile traffic makes it almost imperative that something be done during the coming year.

Faxon Park.

The donation of this property to our citizens will be realized and more greatly appreciated by our future generations. It is too bad that the city is not in the position financially to make this property to the people of the present day what it will be twenty-five years hence.

Safford Park.

This property has now become one of the most attractive features of this residential section of the city. We wish to extend our thanks to the pupils of the Wollaston School who have so kindly contributed and cooperated in the upkeep of this property.

Public Bathhouse.

This popular institution had during the past year perhaps its most successful year since its opening. If it is possible we believe that it would be advisable for the new board to in some way relieve the present crowded conditions in the ladies' quarters. Mr. John Starr who has had charge of

our bathhouse ever since this has been a part of this department is now in charge of the new Fore River clubhouse and it will be incumbent upon the new board to secure a new head for this institution. We hope that the new board will be able to secure some one to fill this important position in the same capable and efficient manner as in past years.

Playgrounds.

The numerous advantages of supervised playgrounds are readily recognized by all. During the past year we conducted five separate supervised playgrounds. This was two more than conducted in any previous year. We recommend that these playgrounds be continued this year. We also wish to recommend to the new board that they consider the advisability of in some manner providing new playgrounds in Wards 1, 3 and 4, which we feel are very much needed.

The average daily attendance during the past year was over one thousand.

Nearly fifteen hundred children attended the annual field day and closing exercises. We regret that in past years greater interest has not been manifested in these exercises, and we hope that in some way this difficulty will be overcome this year and these exercises receive the consideration from the citizens of the city which they deserve.

In closing we wish to extend our thanks to the Wollaston Women's Club for the \$100 which it so generously contributed for the work of our department. We also desire to at this time express our appreciation of the kind co-operative spirit displayed during the year by all of the employees of this department of the city government.

Respectfully submitted,

MATTHEW NICOLL, *Chairman*,
RUSSELL T. BATES, *Secretary*,
C. EATON PIERCE,

Members of the Park Board, City of Quincy.

REPORT OF BOARD OF HEALTH.

January 1, 1917.

The Board of Health respectfully submits the following report for the year 1916.

The following is a table comparing the contagious diseases reported to the Board of Health for the last ten years:

In tenement houses when water closets are installed it is quite common to locate them in the cellars of the same. This in my opinion should be restricted by regulations of the Board of Health. The majority of cellars when used for this purpose are, on account of insufficient light and proper ventilation, from a sanitary point unfit for use as a toilet room. I would recommend that water closets cannot hereafter be placed in the cellar of any dwelling without a permit in writing first having been obtained from the Board of Health.

In the year 1914 the Board of Health had an order introduced into the City Council asking that a charge be made for permits to perform plumbing work. For some reasons the order failed to pass. In some cities in the State a charge is made for all permits issued for this purpose and I think that the same should be required in our city.

A fee is now charged for a permit to build a building, also a permit to install the electric wires in the same, the amount received for permits helping to reimburse the city for the expense that this work creates.

If it is necessary to charge for permits to build a building or to install the electric wires in the same for the reason given, I think that the same should apply for a permit to do plumbing work.

Respectfully submitted,

J. J. KENILEY, *Inspector of Plumbing.*

REPORT OF INSPECTOR OF MILK.

January 18, 1917.

To His Honor, the Mayor,
Quincy, Mass.

Dear Sir: Each year I have urged the necessity of a more thorough inspection of our milk supply in Quincy, but such an inspection would require practically the entire time of an inspector. Under the present circumstances this of course would be impossible, as no man could be expected to devote the necessary time on a salary of \$150 per year and an annual appropriation of \$100, out of which must come the cost of analytical work, licenses, printing and other incidental expenses.

It is my honest conviction that the citizens of Quincy should have their milk supply inspected more often than it is at present possible under the circumstances. All the dairies in the sixteen square miles in Quincy and surrounding towns must be inspected, samples taken to ascertain whether the milk is adulterated, below the standard, or preservative added, and whether it contains more than 500,000 bacteria per cubic centimeter.

It is only necessary to call your attention to a case of one of the largest producers of milk in Quincy. In his herd of 125 cows were some that were giving off streptocci and bacillus coli in such numbers that the physicians in Quincy were reporting cases of septic sore throat and intestinal disorders among young children.

The cows in this particular case were put in groups of five and samples of their milk taken for analysis. In this way it was possible to pick out the offending animals, which were either destroyed or sold for beef. I would, therefore, recommend that if in your judgment the city could pay an analytical chemist \$1800 per year and equip a laboratory in the present dispensary at a cost of \$300 and with an annual appropriation of about \$500 you would no doubt have a department that would be the equal of any in the State. As it would be utterly impossible for me to devote my entire time to this work, I would most gladly resign if the above suggestions meet with your approval.

Yours respectfully,

DANIEL SCOULER, JR., *Inspector of Milk.*

Quincy, Mass., January 1, 1917.

To the Board of Health,

Gentlemen; It is estimated that there are 7,300,000,000 gallons of milk produced annually in the United States. While this figure seems large, it only allows for six-tenths of a pint of milk to each individual. Milk in New England forms about sixteen per cent of the total food of the average American family. While adults consume a large quantity of milk, infants and children use the greater portion, as milk is the principal article of diet up to five years of age.

Of this enormous quantity of milk produced Quincy consumes daily about 12,000 quarts, supplied by 48 milkmen who deliver direct to the consumer or through the 125 stores licensed to sell milk.

Each year I have urged the necessity of a more thorough inspection of our milk supply in Quincy, but such an inspection would require practically the entire time of an inspector. Under the present circumstances this, of course, would be impossible, as no man could be expected to devote

the necessary time on a salary of \$150 per year and an annual appropriation of \$100, out of which must come the cost of analytical work, licenses, printing and other incidental expenses.

It is my honest conviction that the citizens of Quincy should have their milk supply inspected more often than is at present possible under the circumstances. All the dairies in the sixteen square miles in Quincy and surrounding towns must be inspected, samples taken to ascertain whether the milk is adulterated, below the State standard, or preservative added, and whether it contains more than 500,000 bacteria per cubic centimeter. It is only necessary to call your attention to a case of one of the largest producers of milk in Quincy. In his herd of 125 cows were some that were giving off streptocci and bacillus coli in such numbers that the physicians in Quincy were reporting cases of septic sore throat and intestinal disorders among young children. The cows in this particular case were put in groups of five and samples of their milk taken for analysis. In this manner it was possible to pick out the offending animals, which were either sold for beef or destroyed. As an additional safeguard I sincerely believe in pasteurizing. By pasteurizing I mean heating the milk to 145 degrees and holding it at that temperature for thirty minutes. By this means the bacterial germs of typhoid, diphtheria, scarlet fever, septic sore throat and tuberculosis are killed and the high bacterial count is reduced. I would, therefore, recommend that the city hire an analytical chemist at a salary of about \$1800 per year and equip a laboratory in the present dispensary at a cost of \$300 and with an annual appropriation of about \$500, you would no doubt have a department that would be the equal of any in the State.

The average of samples taken were 3.80 per cent for butter fat, 12.92 for milk solids and 175,000 bacteria per cubic centimeter. No preservatives and coloring matter were found.

For list of expenditures and receipts see Auditor's Report.

Respectfully submitted,

DANIEL SCOULER, JR., *Inspector of Milk.*

REPORT OF INSPECTOR OF MEATS AND PROVISIONS.

To the Board of Health,
Quincy, Mass.

December 31, 1916.

Gentlemen: Owing to Mr. Walter G. Field's resigning December 1, 1915, I was appointed Inspector of Meats and Provisions by Gustave B. Bates, Mayor, January 1, 1916. The population has grown very fast the past few years, which means more stores and markets of all kinds in every section of our city. For that reason, I find more time and attention must be given to inspection work. All complaints that have been made to me or the office of the Board of Health were investigated at once and records made of the same, on file at the office.

I wish to thank our marketmen for the courtesy they have shown me the past year. The citizens of our city can feel assured that our markets will be kept in accordance with all rules and regulations of the Board of Health.

Number of inspections for the year..... 478

Meats and Vegetables Condemned as Unfit for Food.

Pounds of beef.....	26
Pounds of corned beef.....	70
Pounds of lamb.....	47

Pounds of poultry.....	40
Pounds of sausages.....	28
Pounds of lobsters.....	6
Bushel of cauliflower.....	1
Appropriation.....	\$75.00

Expended by me during the year 1916:

Automobile hire.....	\$19.00
Carfares.....	16.00
Telephone.....	10.00
Printing.....	5.50
Clerical services.....	5.00

Total expense of department to December 31, 1916..... 55.50

Balance of appropriation on December 31, 1916..... \$19.50

Respectfully submitted,

HOWARD ROGERS,

Inspector of Meats and Provisions.

REPORT OF INSPECTOR OF ANIMALS.

To His Honor, Mayor Whiton:

I herewith submit my annual report for the term of my office for the year 1916.

Cows.

A part of the annual inspection had been made by the late Dr. Abele, whom I succeeded, so that for that part I cannot report. The condition of the stables is generally satisfactory and the cattle in good physical condition but one tubercular cow being found during the year.

Horses.

Glanders would appear to be exterminated as no cases were found and only one suspect reported, and that upon examination was released.

Hogs.

No contagious diseases found among the few hogs owned in the city.

Respectfully submitted,

J. H. GARDNER, JR.,

Inspector of Animals for Quincy.

REPORT OF BUILDING INSPECTOR.

January 1, 1917.

Hon. Joseph L. Whiton, Mayor,
Quincy, Mass.

Dear Sir: I herewith submit my annual report for the year 1916.

Yours respectfully,

WARREN S. PARKER, *Inspector of Buildings.*

Permits Issued.

CHARLES W. HANSCOM, *Inspector of Wires.*

REPORT OF THE ENGINEERING DEPARTMENT.

May 25, 1917

To His Honor, Joseph L. Whiton,
Mayor of the City of Quincy.

Dear Sir: The seventeenth annual report of the Engineering Department for the year ending December 31, 1916, is hereby submitted.

The following is a statement of the work done by the department during the year.

At the request of property owners on accepted streets, street lines and grades have been given in front of 124 estates.

Plans and estimates have been prepared for the City Council or Council Committees as follows:

Acceptance of private ways.....	35
Establishment of building lines.....	3
Proposed street widenings.....	2
Plans for Planing Board.....	10
Plans for Board of Survey.....	3

Commissioner of Public Works Department.

Lines and grades have been given for construction of new streets, new sidewalks and new sewers.

Two new schoolhouses have been built this year and the line and grades for them were given by this department.

Board of Health Department.

Surveys and plans were made for the Board of Health Department in connection with the cleaning of brooks and low areas of land.

Plans and estimates have been made for the Planning Board and the Board of Survey in connection with the work in those departments.

Assessors' Department.

The plans of the Assessors' Department are made on paper and from constant handling are all worn out. It is the desire of the assessors to have the plans traced on tracing cloth and then to have blue prints made to be used each year, which would keep the tracings in good condition.

This work has been started and about one hundred tracings completed and will be continued until all are completed.

Elimination of Grade Crossings.

Early in 1916 a bill was introduced in the Legislature to set aside the decree of the Superior Court whereby the tracks of the Old Colony

Railroad in Quincy, from Saville Street, near the Quincy Station to the Braintree town line, were ordered raised and the grade crossings abolished.

By the provisions of the new bill the tracks were to be depressed and all of the streets crossing the railroad were to go overhead.

Several public hearings were held in Quincy and the question was thoroughly discussed, with the result that the depression plan (so called) was generally favored.

At the public hearings at the State House before the joint committee on Railroads of the Senate and House, the city was represented by His Honor, the Mayor, members of the city government, city solicitor, city engineer, expert engineers and public spirited citizens.

As advocates of the "Decree Plan" (so called) appeared Old Colony Railroad, Bay State Street Railway, Henry M. Faxon and Paul R. Blackmur.

Numerous plans and estimates had to be made in connection with the proposed change.

The bill was reported to the Senate and House and referred to the next General Court.

The question will again come up for consideration before the legislature of 1917.

For financial statement see Auditor's Report.

Yours respectfully,

PATRICK F. O'BRIEN, *City Engineer.*

THE FOLLOWING STREETS HAVE BEEN LAID OUT DURING THE YEAR AS PUBLIC HIGHWAYS.

	<i>Ward</i>	<i>Length</i>	<i>Width</i>
Atlantic Street.....East Squantum Street to Quincy Shore Reservation.....	6	1159 ft.	40
Belmont Street.....Beale Street to Brook Street.....	5	550	40

REPORT OF BOARD OF SURVEY.

To His Honor, the Mayor, and Members of the City Council:

Gentlemen: The Board of Survey respectfully presents herewith the second annual report for the year ending December 31, 1916.

The board was organized on February 7, 1916, with Mr. Walter F. Nichols as chairman and City Engineer Patrick F. O'Brien as clerk.

An appropriation of \$300 was made and expended as follows:

Appropriation.....	*	\$300.00
Stationery.....	\$8.35	
Printing.....	10.65	
Balance.....	281.00	
	<hr/>	<hr/>
	\$300.00	\$300.00

The board has had several meetings and approved the layout of the following ways or streets of the city of Quincy:

Relocation of Clifton Street off Merrymount Road.
Private way off Clay Street.
Francis Avenue Extension to Newcomb Street.

Plan was made and layout staked out for the extension of Warren Avenue from Standish Avenue to Hancock Street, but owing to lateness of season the matter will be taken up again the coming year.

The board adopted new rules governing the application and preparation of plans for proposed new layout of streets or ways of the city of Quincy.

The question of the duties of the board in the layout of new streets or ways and the jurisdiction of the City Council was taken up by the chairman of the board with the president of the City Council and the matter has not been settled but will be taken up again the coming year.

There are at the present time about 350 dead end streets or ways in the city of Quincy and the board would recommend that steps be taken to extend some of these through to other streets before the adjacent territory is built up and the extension becomes so expensive that it becomes almost prohibitory.

The board has approved the work proposed by the Planning Board as to proposed boulevards and extension of main thoroughfares.

Respectfully submitted,

WALTER F. NICHOLS, *Chairman.*
EUGENE R. STONE,
FREDERICK E. TUPPER.
PATRICK F. O'BRIEN, *Clerk.*

REPORT OF THE PLANNING BOARD.

To His Honor, the Mayor, and Members of the City Council:

Gentlemen: In accordance with the requirements of law the Planning Board herewith submits its second annual report.

The board organized for 1916 with one new member, Mr. John R. Richards, succeeding Chairman Charles W. Bailey, whose term expired. Mr. Wilson Marsh was elected chairman and City Engineer Patrick F. O'Brien, clerk.

The courtesy of His Honor, the Mayor, extending the use of his office for its meetings was continued through this year and the board duly appreciates the favor.

There have been sixteen meetings held and one hearing given.

The board has been represented at several conferences to consider organization of a Metropolitan Boston board, also its chairman was in attendance at the Springfield convention of the Massachusetts Federation of Planning Boards.

It is with satisfaction we note that the following recommendations have been carried out during the year:

1. A building line established on Washington Street for its entire length from City Square to the State highway at Chubbuck Street.

2. Building line on Adams Street from Hancock Street to President's Bridge.

3. Building line on Revere Road, Hancock Street to Town Brook.

4. Extension of dead end streets:

- (a) Vassal Street.
- (b) Lunt Street.
- (c) Flynt Street.
- (d) Davis Street.
- (e) Atlantic Street.
- (f) Francis Court.

5. Extension of Street Railway car service beyond City Square to School Street, removing some of the congestion caused by waiting cars.

6. Taking of land at Holmes Street and Billings Road for a bridge as noted below.

7. An order providing a comfort station in connection with City Hall has been passed, according to our plans with the addition of a basement sufficient to house the heating plant for the hall. This feature provides a much needed addition to the offices of the city engineer and that of the Sewer Department. (This order failed of final passage.)

8. The improvement at the curve on Adams Street, opposite the Rice estate was officially endorsed by this board and is today showing beneficial results.

In addition to above, the board has taken up the matter of straightening Centre Street with the town engineer of Braintree.

It has kept the proposition of a State highway on Willard Street, from the Furnace Brook Parkway to the Braintree Parkway before the Highway Commission, also advised with the Milton selectmen regarding the future extension of Holbrook Road through to Squantum Street in that town. This is especially deserving of immediate consideration. With a bridge at Norfolk Downs connecting Holbrook Road and Billings Road and the very short section opened up in Milton, a thoroughfare is possible direct from Mattapan Square to the Quincy Shore Boulevard and is in line with recommendations of the Metropolitan Improvement Commission in its report in 1909.

Early in the year this board presented a plan for the extension of Greenleaf Street from Hancock to Adams Street, also at its easterly end through to Sea Street. An order in the council failed to pass. With the removal of the Porter house from the junction of Hancock and Adams Streets and the building line established on the latter street, we emphatically renew the recommendation and wish to impress upon the City Councillors of 1917 our belief that the immediate good results of traffic removed from City Square will outweigh cost to carry the investment for land and construction of this street extension.

Introspection.

An impartial and thoughtful study of the future for Quincy brings forth these facts:

Atlantic, Norfolk Downs and Montclair are destined to an extensive development in both residential and industrial directions, similar to Roxbury and Dorchester. The river will be no barrier to this when the time comes.

Squantum is almost identical in location and elevation with Staten Island, New York. In the course of time, when conditions created by the city of Boston are removed, this beautiful section should have the multitude of attractive homes and water-side industries that have made Castleton famous.

At the south we shall grow landward from the great Fore River plant. The earnestness of the word from the Waterways Commission, spoken by its chairman to the Board of Trade, is indication of development to which we have not yet awakened.

Takings have been approved by the Governor's Council for an extensive tract of land bordering both banks of Hayward Creek, with the object in view of creating a great tidewater terminal in connection with the Fore River Shipbuilding Co., and their railroad. Tentative arrangements have been made for lease to the latter of the property bordering the northerly side of the creek.

Not only the city but the State, all New England and indirectly the nation will be benefited by this enterprise. The Quincy Planning Board pledges its heartiest support to the Waterways Commission and takes opportunity to make public through the medium of this report its realization of the beneficial results that are certain to follow completion of the project.

The communities at the sea front must continue to expand.

It rests with the future for our granite industry to develop methods and means to give West Quincy its due.

With these prospects in mind the Planning Board submits its plans for a great highway to continue that settled project of the Old Colony Boulevard through Quincy. These plans have been filed with the Pilgrim Tercentenary Commission.

At this time the board also presents an adequate plan to provide a future for our City Hall; a study which embraces area, light, quiet and accessibility, to give to us for many generations to come the opportunity to transact the city's business and preserve its records in an economic and dignified manner.

Pilgrim Highway.

During the last year your board has devoted much thought and attention to enlisting support for its proposed Pilgrim Highway.

The plan contemplates continuing the Old Colony Boulevard, which is laid out 100 feet wide across the Neponset River to the Quincy Shore Boulevard, from which point our plan is to have a highway obtained by widening Hancock Street and Wollaston Avenue, to where it enters Merrymount Park. Intersecting this park it crosses the Metropolitan Shore Boulevard at the head of Black's Creek, thence along the westerly edge of Mount Wollaston Cemetery, through meadowlands and over the old canal at the saw mill, thence along the westerly shore of Town River, coming back to the present location of Washington Street, near the present Fore River Bridge.

In order to interest travel desiring a through route to Plymouth it is necessary to connect this highway with Quincy Avenue by some such street as North Street, widened and extended, as the Quincy Avenue route to Plymouth is some ten miles shorter than the shore route through Cohasset, Scituate, Marshfield and Duxbury. We have been able to obtain considerable interest and publicity in behalf of our plan by explaining the little known fact that from Quincy Centre, which is the local point for nearly all travel to Plymouth and the South Shore as well as for a considerable part of the travel to Cape Cod to and from Boston. There is no direct highway through to the heart of Boston that is suitable for automobile traffic.

The direct roads from Quincy Square to Boston are either Hancock Street, which is not a suitable highway, as at present constructed, for pleasure travel, or the route via Granite Avenue, which is circuitous and not adapted for automobile travel. Neither of these routes if properly constructed would relieve the dangerous congestion which obtains in Quincy Square, due to through automobile travel during the busy hours of nearly any day at the present time. If there should be a celebration at Plymouth of the three hundredth anniversary of the landing of the Pilgrims, which is possible, it would stimulate to a great extent automobile travel to Plymouth and the surrounding towns, and the conditions which at present are dangerous in City Square would be made much worse unless this travel was entirely removed by the construction of some such highway as is advocated by your board. This plan would also segregate the rapidly moving automobile travel from the slower moving business traffic and street cars, a condition which all highway engineers recognize as absolutely necessary since the introduction of the automobile.

City Hall Site.

In considering a future site for a new City Hall this board adopted a system of elimination. The present location is contracted, noisy from passing trains and street cars and subject to cinders and dust in summer. Locations directly on the main streets had the above objections to a greater or less degree. In presenting a plan of the lot on the easterly corner of Coddington and Spear Streets, we find a high, fairly level spot, less than 700 feet from Hancock Street, with ample space for a commodious building, which should be in design harmonious with the library and an impressive addition to the growing civic center which happily has sprung up by chance.

To give additional approach to these grounds a new street is planned, starting from Washington Street, about midway between Maple and Foster Streets, and extending directly through the southeasterly border of the City Hall lot, meeting Coddington and Newcomb Streets at their junction with Woodward Avenue. The two photographs submitted give one a view of the location and the other an outlook from the proposed site. This latter view affords ample evidence, if any is needed for conviction, that the location is not too distant from the center to meet all requirements of our city.

City Dispensary.

The Tuberculosis Dispensary is located on High School Avenue and was opened to the public July 8, 1916. It was erected at a cost of \$2500 and is a neat, one story and a half building, well set in the center of an attractive lot, which has been laid out with shrubs, trees and flower beds, and which by spring will be a beauty spot and a real addition to that section of the city.

The building contains an office, laboratory, physician's examining room, a dressing-room for men and one for women, also three sets of lavatories and toilets for men and women patients, one for the nurse and one for the physician; also an unfinished attic for the nurse for use during her occasional stay.

All the furnishings and supplies from the Tuberculosis Camp were brought here and are being used. The dispensary is in charge of Miss Edith A. Babcock, a graduate nurse and trained social worker, and of Dr. William M. McCausland, as clinic doctor. Clinics are held Tuesday and Friday each week. Patients for tuberculosis only are examined and are sent here by physicians by the Board of Health, the Massachusetts General Hospital and by social references. The nurse also visits and gives relief in the homes when patients are unable to call at the dispensary.

A great amount of good is being accomplished in a quiet way by the dispensary in its simple and inexpensive quarters under skilful and able management.

Tree Nursery.

An industry which concerns the beauty of our city is but little known and the Planning Board wishes to commend the forethought and enterprise of a city official which made it possible. We refer to the Tree Nursery upon the Old High School lot adjacent to the new dispensary. We give a brief outline of the project in the words of its originator and custodian, Andrew Stewart, local Moth Superintendent.

"Under the administration of Ex-Mayor Stone, Commissioner Tupper freely granted me the use of the Old High School lot on High School Avenue, for a Tree Nursery in the spring of 1912. There are

approximately between 900 and 1000 trees in the nursery, of which about 65 are oak and the balance mostly maples. Up to the present time the nursery has cost the city nothing, as the trees have been collected from different parts of the city, as saplings. During the present year about 65 maple trees have been set out along the various streets. The city will soon be in a position to replace all old or dead trees as removed, and also to set out trees on new streets when opened to beautify them."

1917.

This coming year the Planning Board has a list of projects to consider for the betterment of the city. It will appreciate helpful suggestions from any one who has the progress of our community at heart. The new departure of nine councillors will throw added burdens upon these busy members as well as upon the executive, but we ask continued co-operation looking to the civic good.

WILSON MARSH, *Chairman*,

Total amount collected on previous assessments	6,205.47	
		<u>\$161,830.14</u>
Total collections for the year 1916.....		

During the year extensions were made on 56 streets, the sizes of pipe being from 4 inches to 10 inches. The total amount of pipe laid was 16,996 feet.

Forty-one fire hydrants have been set, making the total number now in use 1119.

Three thousand three hundred and sixty-nine feet of old pipe was abandoned and replaced by larger sizes.

Four hundred and three new service connections were made, making the total number of services in use 9706.

Six hundred and thirty meters were set, making the total number in use 8872. For further detail see the accompanying tables.

Balance.....	\$283.57

This year an appropriation of \$35,000 was made by the City Council for sewer construction and work was begun about the last of April and carried on until December 1. The work consisted mainly of short extensions of lateral sewers in different sections of the city. The location, length and size of these extensions can be found in the appended table.

We were unable to take care of all the extensions petitioned for, some of which are extremely urgent. Among these are the main line to take care of the Wollaston Park Annex and a lateral sewer in Nelson Street, West Quincy. I earnestly recommend that an early appropriation be made by the incoming council to take care of at least these two.

An air compressor and drilling outfit was purchased this year for our rock work and, although its arrival was somewhat delayed, there was sufficient rock work left to give the machine a thorough trial. It has proved very satisfactory and is something that ought to have been acquired long ago. It has been rented both to the Highway Department and to the Water Department for their rock excavation.

There have been 415 applications for house connections with the public sewers and 401 connections have been made classified as follows:

By Wards.						Total

REPORT OF THE TRUSTEES.

To His Honor, the Mayor of the City of Quincy:

The Trustees of the Thomas Crane Public Library beg leave to submit their forty-sixth annual report as follows:

The past year has been marked by increased usefulness of the library. That this is true is evident in many ways, but in none more noticeably than in the large increase in circulation, which, of course, is a recognized index of real growth. The increase in circulation last year over the previous year was nearly double the similar increase in the year 1915. This was due, of course, in large part to the more generous appropriation by last year's city government, which enabled us to purchase new books so as more completely to respond to the demands of the reading public. For some years past the library has actually suffered from insufficient funds, with the result that not only were we unable to supply the demands for new books, but we were actually obliged to forego the making of necessary repairs on old books. This was an unfortunate situation, and we sincerely hope it may be avoided in the future.

Not only has there been this most gratifying increase in circulation during the past year, but the use of the library has also been extended and diversified. There has been a large increase in the use of the library by juveniles. The schools and the branches at West Quincy and Atlantic have demanded more books than ever before. The Sunday opening of the main library is better appreciated and is being taken advantage of by an increasing number of readers. For more than a year, by arrangement with the management of the Fore River Shipbuilding Corporation, we have been sending books for use by the employees. We have recently been asked to make a similar arrangement with the Boston Gear Works. All this tends to make the library more useful in the community, and we therefore welcome all such opportunities, so far as practicable.

In order to make the books in the main library more available we contracted during the latter part of the year for the installation of open shelves, which will accommodate some 3000 volumes. This is in line with the best thought in library management, and will undoubtedly receive the appreciation which it will merit.

Not all of our citizens are aware of the value of our library building as a notable type of architecture, and as such widely known among architects and students of architecture. During the last year we have erected an appropriate sign on the grounds with the simple inscription, "Thomas Crane Public Library," as we have learned that many people have frequently passed the building without knowing that it is a library.

The real progress achieved last year makes it imperative that we insure its continuance in the future. This can only be done by continuing our purchase of new books in sufficient number to keep pace with the needs of a rapidly growing city of now over 40,000 population.

The West Quincy branch has grown so rapidly that we have outgrown our quarters and some change must be made in the immediate future.

The demand for a branch in Wollaston is growing and insistent, and lack of funds alone has prevented us from establishing one in that section of the city. In closing, we strongly recommend a branch at Wollaston. Such a building should be owned by the city. We also recommend that when a change is made in West Quincy we adopt a similar policy, and own our branch building.

Respectfully submitted for the Trustees,

GEORGE W. ABELE, *Chairman.*

F. MORTON SMITH, *Treasurer.*Approved: H. O. Fairbanks,
*Auditor of Accounts.***REPORT OF LIBRARIAN.***To the Trustees of the Thomas Crane Public Library:*

I have the honor to submit my report for the year ending December 31, 1916. For the confidence in and support of the public library as shown by the generous appropriation of the city government for the year 1916 I wish first to record our grateful appreciation, and secondly to give an account of our stewardship.

The year has seen the largest number of books added in any one year of the library's history, namely 4021, bringing the total number of volumes up to 41,311. Of 3786 books purchased, 1701 were new titles and 600 were duplicate copies, and the remainder, 1485, brought the replacements of popular worn out books up to date.

Among the important purchases of the year have been the eleventh edition of the Encyclopædia Britannica, the New York Times Index, Holm's Practical Shipbuilding, a portfolio of 56 mounted photographs of the granite industry of Quincy, and a set of *St. Nicholas*, 78 volumes, for the West Quincy branch. We have received the volumes which complete the second edition of the New International Encyclopædia, and sent our earlier set to the Atlantic reading room.

The use of the books of the library was likewise the largest in its history, a total circulation of 167,922; an increase of 4010 over the circulation of 1915. This gain was nearly double the gain in 1915 over the previous year. The library had the good fortune not to be closed on account of the infantile paralysis epidemic, as some libraries were, but the fears of contagion at that time no doubt lessened the patronage of the library, especially of the children's room and branches. The circulation at the main desk decreased 3209 in 1915, and in 1916 it increased 3014, the evident result of a more liberal purchase of books. Of this gain over the previous year, the fiction increase was only 1048; non-fiction circulation gained two per cent in the year's output, due, without doubt, greatly to the larger number of non-fiction placed on the display cases and wherever there was available space in the reading room — an argument, we think, for the open-shelf book room. The use of books and magazines in the reading room is not recorded, but all workers at the desk notice its growth, and 1919 volumes have been brought from the stack room for readers and students. Exclusive of the new fiction, 17,672 books of popular fiction have been put on the shelves outside the delivery desk during the year, and still the fiction readers cry "Give." Plans are already under way toward the realization of more of an open-shelf book room.

In November the Woman's Education Association of Boston lent us 47 books in the Swedish language for six months. The Fore River Shipbuilding Corporation has borrowed 254 books, and there is need for

duplicating some of those most useful to their employees, as there are many calls for them here. Mr. Bruce Saville's model of a proposed statue of John Hancock was on exhibition for many weeks, and we have had the usual number of exhibits from the Library Art Club.

Music.

The music collection was increased by 21 volumes, including vocal and instrumental music by well-known composers, light and standard operas. This department, small as yet, numbering 133 volumes, of which 33 are the Musician's library, should continue to grow, for returns of usefulness well repay the outlay, as shown by the circulation, 1358, versus 1108 in 1915. These figures do not include books about music and musicians.

Registration.

In a total number of registrations in 1916 of 1870, the additions in the juvenile registrations are 903, and in the adult 967; a difference of only 64 more adult than juvenile during the year. Furthermore, the number of juvenile borrowers in 1916 shows an increase of 141 over those registering the preceding year; while the number of adult borrowers decreased by 96 during the last year as compared with 1915. The new juvenile registrations at the West Quincy branch in 1916 numbered 240, adult 53; at the Atlantic reading room, juvenile 111, adult 153. At the central library, 761 registered in main hall and 552 in the children's room. This makes a net increase after cancelling those known to be no longer borrowers of 1514 for the year.

Work With the Young People and the Schools.

The registration figures given above justify not only the figures of purchases of juvenile books the past year, but also my yearly plea for a supply where the collection is still all too meagre to satisfy this growing demand of the children. We added in the children's room 393 new titles and 338 duplicates. But even with 1098 replacements of popular worn-out copies, a large number of them 1915's legacy to this year, the net gain is but 822 volumes. In our work with the schools we are greatly handicapped by the lack of a special school collection. This will be referred to later.

The "library games" have borne fruit in a more intelligent use of the card catalog and reference books. The special vacation reading list stimulated the children to borrow good books, and at the close of the year we published a selected list of books recommended to seventh and eighth grade pupils, which will be sent to the various schools. The picture collection is still inadequate but growing, and, small as it is, has been made much use of by the teachers in their classroom work.

Miss Packard invited pupils of the Washington School to a guessing story contest in the children's room about famous men and women, held a character party here and repeated same at Atlantic reading room, gave a picture book story hour for the youngest readers at the latter, and told stories for a half-hour at the Wollaston and Massachusetts Fields Schools to introduce good books to the children. Especially worthy of mention is the usual Christmas party in the children's room, with decorations, a tiny Christmas tree, the telling of one of Andersen's stories, and a little Christmas play. Too much praise cannot be given to Miss Packard for her unselfish labors at this busy season and all other times, involving

much outside work, to give pleasure at the library and happiness to so many little children.

The librarian gave three talks at the library to the girls of the new neighboring Home-making School. Duplicate copies of books were bought and reserved for their use on shelves in the reading room. Books were reserved also for the pupils of the High School for their work in English, history, science, and mechanical drawing. Upon notice of an exhibit of pictures of industries, 179 children from the grade schools visited the art gallery.

West Quincy Reading Room.

Owing to the lack of an adequate supply of books from the central library in 1915 and the early part of 1916, the circulation here by August had fallen off 2259 as compared with that of the previous year. In September, 294 new books, the foundation of its own permanent collection, were sent to the reading room. This made it possible to so far meet the growing demand, largely for juvenile non-fiction, that the year closed with a decrease of 740 only over the circulation of 1915, the result of the last four months' growth. This collection should be constantly increased and renewed. The work of this branch is largely with children; in a total circulation of 29,666, 20,439, or over 68 per cent, are issued to children. The cost of maintaining the reading room in 1916 was \$1,840.03. I will let Miss Wainwright's own words tell the story of the further need as she sees it.

"The new method of 'reading' in the public schools brings a demand for varied material in the short story form. As we have no school collection, our books for teachers are drawn from the general collection, which, of course, reduces the available material on the shelves. Teachers from every grade in the Willard School are frequent visitors, while the Gridley Bryant, John Hancock and Lincoln Schools also come to the reading room for material. It would seem both wise and well to have a collection of books for their use; at the present there is not much to offer to the teachers after the children have made their selection from the shelves. . . . The most needed addition to our present equipment is the 'school collection' borrowed from the central library (as I imagine we cannot hope to have our own) but separate from and in addition to our deposit exchange."

Continuing her report, Miss Wainwright says: "There has been a notable falling off in the Italian circulation, shown by the figures 148 for this year as compared with 253 for the year 1915. As the readers are exclusively men it is possible that this is due to the war.

"The service of the reflectoscope has been extended. It is now used by the master of the Willard School in his lessons in geography and history. This was made possible by a set of window shades furnished by the manual training class from material provided by the custodian."

Atlantic Reading Room.

The month of October, the only month in which any cases of infantile paralysis were reported in Atlantic, saw a large decrease in circulation from this room. The total decrease in 1916 was 343 over the previous year. There were 474 books sent on request from the central library, and three were borrowed from the Boston Public Library for patrons here. A largely increased amount of reference work has been done with pupils of the near-by school, the High School and Woodward Institute. Gifts of books and newspapers have been received.

Cataloging.

One large task the past year, under the charge of the catalog department, has been the removing of the numbers from the adult fiction and the arranging of the books alphabetically. This is in accord with a growing practice of up-to-date libraries, and as the fiction in the children's room had been done in 1910, all fiction may now be called for by author and title. With the increased demands upon this department by the purchase of 3786 books, versus 1200 in 1915, with much readjustment made necessary by changes due to illness, it has been an arduous year. Miss Clark has "made good" in the opportunity given her to take up the work of cataloging and classification in addition to certain hours at the reference desk, and Miss Whittemore's duties have been manifold. Both have been of invaluable assistance to Miss Cochrane.

Publicity.

A collection of advertising literature from railroad and steamship lines was put on one of the reading tables, and that proved to be a most popular table the entire summer. Postal cards have been sent to persons who might be interested in special books. The weekly "Notes" have been continued every Thursday in the *Patriot-Ledger*, and we appreciate the courtesy of the publishers for this space. These notes consisted of book criticisms, selected lists on current events, reports of library activities. Bulletin boards and display cases have called attention of visitors to such topics as household sanitation, canning and preserving, the poet Riley's works, etc., with the books themselves near at hand.

Again at Christmas time books both new and standard, expensive and inexpensive, suitable for gifts for children, were shown in the children's room. Work with the clubs has continued along the usual lines. Since October Miss Hyland has had charge of the publicity work, club work, and book ordering.

Book Repairs.

The usual amount of mending has been done under the efficient workmanship of Miss Murphy and Miss Maybury. Less money has been spent for binding the past year, 17 boxes having been sent to binder while 27 were sent in 1915. In this connection let me say that 385 books in the adult collection and 1100 in the juvenile, versus a total of 287 in 1915, have been replaced by fresh, clean copies.

Reclassification.

A year of splendid and satisfactory work is the report from Miss Alexander of the accomplishments of 1916. Books reclassified, 9606, which is 3446 more than in 1915. Of the adult circulating non-fiction there now remain approximately 1000 books to be reclassified. There are still some 800 or 900 works the cards of which are not in the card catalog. Then there is the comparing and straightening out of the official records, the revision of numbers changed on the cards in the catalog, final verification, etc., to be done. I hope that this large undertaking may be entirely finished, including the reference books and the document room, which will no doubt require the balance of the year.

Sunday Opening.

Here also seems a somewhat more encouraging use of the library than hitherto; not so much in numbers as in the more serious use for reading

and study. Often help has been given in reference work. The smallest number of visitors was 11 (good skating) and the largest 92, with the proportion of High School pupils for the year 36 per cent. The average number of readers per Sunday was 35. There is still room for a larger appreciation of the privilege, as the figures do not vary materially from the two previous seasons.

Staff.

Miss Hyland, one of our most valued workers, was absent from the library for nearly six months on account of illness. She returned to us the last of September, and is still unable to give full time to the work. In September, Miss Callahan, Miss Clark, and Miss Packard, who had been practically members of the staff since their summer course at Simmons College in 1915, were technically added to it. On November 1 Miss Louise Prout left us to be married, and on December 31 Mrs. Dorothy Kingsbury White resigned. Miss Alma H. Farr, who has had eight years' experience in the Greenfield Public Library, has begun her duties with us.

The library certainly has forged forward during the year just ended. But this only sets the pace for the next year's growth. We cannot stand still, and we ought not to go backward. We shall need more money this year. The increasing cost of almost all the supplies that have to do with our special work — paper, ink, binders' materials, etc., makes itself felt in almost every purchase; in the increasing prices of magazine subscriptions; in the printing of our regular quarterly index and all other lists; and even in the cost of the very books themselves. To this add the high price of coal and other general necessities, and the high cost of living affects us very materially.

Even at this writing comes a request from the Norfolk Downs Improvement Association for a deposit station of 200 or more books in place of the little-patronized delivery basket of their section; the renewed desire of the Boston Gear Works for a regular supply of books for the use of their employees. Also the Quincy Industrial School wishes again their quota from our shelves, and there is the oft-repeated request from the Wollaston Woman's Club for a branch library in Ward 5. None of these calls should go unheeded in a city the size of Quincy with a library which should be a potent factor in the community.

The year of work has been especially difficult for those of us who have been here the entire time, and I wish to express my appreciation for the ready adaptability and faithfulness of those who have enabled me to report a busy and useful year. It is only through the co-operation of all that the increasing service of the library through a year of steady growth has been made possible.

Respectfully submitted,

ALICE G. WHITE, *Librarian.*

REPORT OF THE SCHOOL COMMITTEE.

To the Citizens of Quincy:

The School Committee of the city of Quincy, in conformity with a statutory requirement and in discharge of an agreeable duty, submits this, its annual report of the year 1916, the same being the sixty-sixth public school report to be made in Quincy.

At the beginning of the year, the Mayor and City Council, sharing the common sentiment of loyalty for the cause of popular education, placed at our disposal the sum of \$246,743.46, which was the amount asked for in our budget, plus receipts. We have this year, as in previous years, kept within the amount asked for and appropriated and we shall close the year with an unexpended balance of about one hundred dollars after paying a few bills which are at this date outstanding.

Much though we should like to avoid what might appear to some as needless reiteration, we feel constrained by a sense of candor to express again our continued and unqualified confidence in our Superintendent of Schools, Albert L. Barbour, and our appreciation of his ability, zeal and industry. We confidently assert that better results were never obtained in our schools than during the eight years that he has been with us. In this connection we take occasion to observe that he and all concerned are fortunate in the kind of principals and teachers who serve under him. Friction is unknown and fidelity and unity of purpose are plainly evident in all the schools.

The past year has not been particularly eventful, but steady progress has been made and two new features have been adopted.

A State-aided Industrial School for girls was opened in the Arnold house, adjacent to the Coddington School. Thirty girls are enrolled and the school is expected to give a good account of itself in due time.

Two school nurses have been engaged and are giving their entire time to looking after the health of the pupils. A dental clinic for all the schools has been established at the Coddington School, with Dr. Bernard N. Farren in charge. It has been found that the services of nurse or dentist increase the well-being and efficiency of the pupil treated, to a remarkable degree.

At the beginning of the school year infantile paralysis was quite prevalent in Massachusetts and had made its appearance in Quincy. Quite naturally, parents were deeply concerned, and numerous requests were made that we defer the opening of the schools. After they were opened several requests were made that we close them for a time. It was the opinion of the School Committee and the local Board of Health, however, as well as that of the State Health Inspector and practically all the physicians in Quincy, that the children were safer in school, under the vigilant eyes of teachers, school nurses, Board of Health nurses and school physicians, than they would be away from school, and that the disease could be more easily controlled if we kept the schools open. We acted accordingly as a matter of imperative duty, as we saw it, much though we would like to do anything that might allay the fears of those

parents who took a different view of the situation. The results justified the wisdom of our course. So far as known to us, only two pupils were attacked by the disease. There was recovery in each case.

The growth of our school population goes on apace. Our enrollment this year is 7593 as against 7187 last year. The city continues to grapple as best it may with the ever-present problem of school congestion. The two new buildings to which reference was made in last year's report are being erected and rapidly nearing completion. They are sixteen-room schools, of much larger dimensions, with one exception, than any heretofore erected in this city, and necessarily more expensive. The one in Ward 6 we have named the "Francis W. Parker," in honor of Quincy's first Superintendent of Schools, a man who, to quote the words of John Quincy Adams, "transformed our public schools, finding them machines and leaving them living organisms," the man who, to quote Mr. Adams further, "breathed life, growth and happiness into our schoolrooms." We felt that his name should be perpetuated in this city where he developed his famous system and that there could be no more appropriate monument to his memory than this modern schoolhouse. Such a name must also, in our opinion, serve as a stimulus to every teacher who may be employed in the school. Our action may be tardy recognition of what our schools owe Colonel Parker, but it will be admitted that it is fitting recognition.

The other school, that located in Ward 2, we have named the "Daniel Webster" in honor of a great advocate, whose name on building or diploma will ever serve as an incentive to high aim.

Although land for a schoolhouse site was purchased in Squantum some time ago and the need of a school in that section is growing more and more apparent, we did not feel justified in requesting the City Council to make an appropriation for the purpose this year because of the unusually generous, although strictly necessary, appropriation made for school administration this year, and the imminent need of more High School accommodations. At the High School, with normal seating capacity for 960, we are accommodating 1116 pupils. It has been found necessary to furnish and occupy laboratories and a part of the Assembly Hall for classroom purposes. In several instances pupils have no desks, being limited to chairs for furniture.

The friendly and intelligent interest manifested by the people in the schools and the administration of our trust has been a source of satisfaction to us. We hope the same commendable interest will be sustained. To the press are due our thanks for disseminating useful information concerning the schools from time to time and helping maintain in the community an atmosphere of fairness for those having them in charge.

It was a saying of Aristotle that education was an ornament in prosperity and a refuge in adversity. The accuracy of the assertion cannot be gainsaid. It may also be safely said that the life of the republic will continue to depend upon the maintenance of a high degree of popular intelligence.

For the two reasons suggested, Quincy must continue to maintain her schools at their present and past high standard, making ample provision for the increasing demands of the changing times. We cannot close this report more appropriately than by quoting the tribute of Horace Mann. He says: "Let the common school be expanded to its capabilities; let it be worked with the efficiency of which it is susceptible and nine-tenths of the crimes in the penal code would become obsolete; the long catalogue of human ills would be abridged; men would walk more safely by day

and every pillow would be more inviolable by night; property, life and character held by a strong tenure and all rational hopes respecting the future brightened."

The foregoing report, presented by a special committee consisting of Mr. John D. Mackay, Dr. E. H. Bushnell and Dr. D. A. Bruce, was adopted as the annual report of the School Committee of 1916.

ALBERT L. BARBOUR, *Secretary*.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

Mr. Chairman and Gentlemen:

I have the pleasure of submitting herewith my eighth annual report as Superintendent of the Public Schools of this city, it being the forty-second in the series of such reports.

The Year's Progress.

It is rarely that any year in our city witnesses so much progressive and constructive work in education as has the past year and the community may reasonably be proud of its willingness to finance and to support its governing authorities in the working out of their plans.

There are, first of all, two splendid schoolhouses approaching completion and being anxiously awaited.

There is a State-aided and approved Home-Making School for girls, successfully organized, comfortably housed and equipped and apparently destined to fill a distinct place in the city's school system.

The Boys' Industrial School has had an extension into another trade and the past year has seen a large room equipped as a machine shop and a group of boys enrolled in the machinists' course.

The addition of a primary supervisor, giving her full time to methods of instruction in the first three grades, is proving a splendid success.

On the side of public health promotion, the year has seen the employment first of one school nurse, then a second, as well as the equipment of a dental clinic which proved an immediate success and unquestionably has met popular approval.

All the foregoing measures are of marked worth; they represent a distinct step forward and they contribute very materially to the educational advantages that the city has to offer.

Finances.

Each year the cost of administering the schools of the city rises above the cost of preceding years, both in total and per capita. An increased total is to be expected annually so long as our school population gains rapidly and so long as our community continues its present commendable interest in vocational and evening schools and in the health side of public education.

An increased per capita cost is also to be expected annually, both because the costs of all types of commodities and labor are rising to new levels and because a progressive school administration must provide for its citizens and their children those educational opportunities which fit best and most broadly for life. For that reason, with school costs rising generally, with New England communities providing more completely for their children, there is no necessity for apologizing because our own school costs are in line with the general tendency. Rather should

we satisfy ourselves that the city of Quincy is expending as much as it should to get the best results and we should inquire whether in some directions a slightly increased expenditure would not bring largely increased returns.

As an illustration, the School Committee in September appointed, at my request, a primary supervisor who was to give her entire time to the supervision of methods of teaching in the first three grades. The added expense to the school cost of those three grades scarcely exceeds one per cent, but, on the other hand, we are expecting and obtaining an increase in efficiency far in excess of the proportionate results which such an expenditure brings.

Also, the opening of new schoolrooms, reducing the number of pupils per teacher, while causing an increased per capita cost, brings an increased efficiency entirely out of proportion to the cost. By the same process of reasoning, it is poor economy to pay teachers less than the prevailing salary scale in other cities or to omit any provision which will make the city's educational system produce its maximum output with the minimum waste or lost energy. With this policy the School Committee has always been in accord, and, I think, this community as well.

School Accommodations.

The close of the present school year finds the school buildings of the city badly crowded, but we look forward to the occupancy of two sixteen-room buildings now approaching completion. The Francis W. Parker School will obviate the necessity in Wards 5 and 6 of any child on its way to school crossing the railroad track. It will entirely relieve, for some time to come, the congestion now prevailing in the Wollaston and Quincy schools, and will reduce for the time being the numbers at the Massachusetts Fields building. Incidentally, twelve to fourteen rooms of the new building itself will be occupied as soon as ready.

The Daniel Webster School will adequately relieve the Adams, Coddington and Washington Schools and will also be nearly filled when opened for occupancy. The marked growth of the city in Wards 1 and 5 indicates that within a short time a new building will be required which will serve the children of that section of the wards near the boundary line.

The attendance at the High School has now reached a stage where immediate consideration is necessary to provide for the future. Whether that provision shall be in the nature of another central high school or by the provision of Junior High Schools must be carefully considered and a decision reached. From the pedagogical standpoint the Junior High School system has undeniable advantages. From an administrative standpoint it occasionally presents certain difficulties which are peculiar to each individual community and which it is difficult to overcome.

Briefly stated, a Junior High School system would work out the following results:

1. There would be an increased number of schools providing instruction for the first six grades.
2. There would be a small number of centrally located buildings providing instruction in the seventh, eighth and ninth grades.
3. The present High School building would become the Senior High School, providing instruction for the tenth, eleventh and twelfth grades.
4. There would be in the Junior High School all the work now done in the Freshman year of the present High School, together with an opportunity to make a differentiation of work in the seventh and eighth grades at an earlier age than is now possible.

The advantages of the Junior High School may be briefly summarized thus:

1. The opportunity which the Junior High School provides for earlier and more gradual differentiation of courses than now obtains under the present system, recognizes the physiological stages in education, makes education a more continuous process and meets the needs of individual differences more completely than is now possible.

2. The bad break between elementary schools and High Schools now existent is avoided, closer articulation is provided for and the pupil is led over gradually from the maternal system of government of the elementary grades to the full personal responsibility of the Senior High School.

3. Opportunity is given the child in the Junior High School to find himself more completely than is now the case, before he goes on to the Senior School. He is introduced earlier to subjects and work which will give him vocational information and enlightenment; there is provision for more pre-vocational training and information than is now possible and, while vocational choice will not be made any earlier than is now the case, it will be made with greater intelligence.

4. The system provides for an earlier opportunity to begin the study of foreign languages and for a greater amount of attention to manual training and household arts than is now possible, both of which are greatly to be desired.

The Junior High School needs for its proper development a special type of building with gymnasium, shops, laboratories and special equipment, it needs teachers of special training and education and should be regarded as a distinct type of school, with a definite mission and part to play in the educational system.

A Junior High Schools system is not a device to save money and it is a mistake to advocate it from that standpoint. As a matter of fact, if it does what it is intended to do, it will result in increased per capita expense. Neither can a Junior High School system be imposed easily in all instances on the existing system.

The topography of a city and the location of its school buildings already in use have a very great part to play in the solution of this problem and the difficulties arising from these factors are frequently the determining ones.

The greatest problem that the Quincy School Committee has before it at the present time is to decide whether the situation is yet ripe for the adoption of the Junior High School system and to plan its building program accordingly. In all probability the present High School building will be so crowded next September that a resort to the two-session system may be necessary. At all events, the immediate consideration of a High School building program is now in order.

Supervision — Teacher Improvement.

Brief mention has just been made of the fact that a supervisor of primary methods is now employed for the purpose of enabling the teachers of the first three grades to get the greatest possible returns from their efforts. I would suggest and recommend that, with the opening of the new buildings now under construction, a second supervisor of methods be engaged to work with the teachers above the third grade. No expenditure the city could make would bring better and more prompt returns.

To secure the best possible results from the efforts of the teaching staff, supervision should be sufficiently close and personally helpful to enable every teacher to work with enthusiasm toward the realization of definite ideals. It is quite obvious that the Superintendent, with his multiplicity of duties and demands on his time, with the large amount of attention which he must give to general administrative details, with a general oversight of the many types of schools now conducted, is limited as to the amount of time that he is able to give to individual teacher improvement.

The district master, too, must divide his time between administrative and supervisory work, between office duties, school banking, athletics and the many details which go to make up the school world which he manages and, while he is able to give much help to the individual teacher, the school still needs the assistance of the supervisor who can give her entire time to method supervision unhampered by any of the duties of administration. The supervisor is able to get an intimate knowledge of the methods of instruction, viewed horizontally, grade by grade, through the schools of the entire city, which neither the Superintendent nor the master of the building can ever acquire.

This city, a good many years ago, inaugurated the policy of giving two buildings to a master, a policy which in the last few years a great many other and larger cities have begun to follow, as a wise and economical one. Accompanying this policy of making the master directly responsible for the administration of a fairly large school unit, we should follow the example of a great many other wisely administered school systems in providing ample supervision and assistance in teaching methods by supervisors who shall be responsible for certain sections of the school curriculum under the direction of the superintendent and in co-operation with the masters.

Within the past few years, a great amount of attention and study has been directed toward establishing standards of attainment in given subjects and grades. The teaching force of this city has kept in close touch with this progress, has followed its literature and in such lines as it appeared practicable has adopted these standards as its own by which to measure its progress. The setting up of these standards is a source of great satisfaction to the conscientious and progressive teacher. No longer is she obliged to gauge her progress by rule of thumb or guess methods. She knows exactly what may be expected of a given grade, pupils themselves learn to appreciate it, and definiteness takes the place of uncertain groping.

Health and Hygiene.

The School Department has made its greatest advance this year in that line which is the most fundamental of all, the conservation and protection of children's health. In January the Committee continued the services as school nurse of Miss Jackson, whose employment was financed originally by the Quincy Women's Club, and in September, finding that one nurse was unable to do all the very necessary work which was pressing, an additional nurse was engaged.

The serious epidemic of infantile paralysis coming on at this time obliged both nurses to turn aside from everything else and devote all their attention to following up the course of this disease, and their efforts were supplemented for two or three months by two nurses who were engaged at the expense of the Board of Health.

The very thorough and careful work done by the nurses during these months, in the schools and in the homes, has given a great many of our

citizens a realization of the value of the service rendered by such officials which they could have obtained in no other way. The figures given herewith are of interest as showing the surprising amount and variety of service which has been rendered during the year in the interest of public health. The figures should be read and read carefully to appreciate the volume of this work.

Summarized Report of the School Nurses.

Miss Jackson, from January 1, 1916, to January 1, 1917.

Miss Rand, from September 1, 1916, to January 1, 1917.

New cases examined for various causes.....	2654
Old cases examined for various causes.....	4811
Homes calls made.....	1120
Cases referred to school physician.....	541
Cases referred to school dental clinic.....	360
Cases referred and taken to Forsyth Dental Infirmary.....	331
Cases referred and taken to Eye and Ear Infirmary.....	226
Cases referred to other clinics.....	16
Adenoid and tonsil cases operated on at Quincy Hospital.....	8
Total operations arranged for adenoids and tonsils.....	34
Examinations made with Board of Health for scarlet fever.....	8173
Number cases scarlet fever found in school and excluded.....	11
Number cases diphtheria found in school and excluded.....	1

In September the School Committee opened a dental clinic in the office of the Coddington School, provided it with up-to-date equipment and selected as the school dentist Dr. Bernard N. Farren, at that time connected with the Forsyth Dental Infirmary in Boston and consequently thoroughly experienced in dental practice among children. The clinic is open daily from nine to five, except on Saturday, when it is open only during the forenoon and when only extractions are attended to. On other days ten children come to the clinic for filling in addition to any emergency cases that may be sent in. The children are selected for treatment at the clinic by the school nurses and must before treatment secure the written consent of their parents. All fillings are of porcelain or cement and no general anesthetics are employed in extractions. A slight charge is made each patient, sufficient to pay the cost of materials used.

Work was begun in the last grade of the schools and thus far the cases in that grade have not all been completed, a fact which gives some idea of the great need of the service which this clinic brings. The detailed statement which is given of Dr. Farren's work since September 1 is of interest.

Report of the Dental Clinic.

September 12, 1916, to December 23, 1916.

Number of patients treated.....	469
Number of visits.....	1089
Number of patients dismissed.....	112
Number of patients discharged.....	41

Fillings.

Number of amalgam fillings.....	437
Number of cement fillings.....	568
Number of temporary stoppings.....	226
Number of zinc oxide fillings.....	147
Number of synthetic fillings.....	20
Number of treatments.....	260

Extractions.

Permanent teeth.....	220
Temporary teeth.....	584
Cleanings.....	189

In the light of the above report it is needless for me to say anything in behalf of this type of work. So much has been said about the influence of oral conditions on general health that, I believe, this community is well informed in the matter. The establishment of such a clinic as the Quincy clinic is a credit to the community.

Arrangements were made the latter part of the year which obviated the necessity of children being taken to the Boston Hospital clinics for tonsil or adenoid operations. The Quincy Hospital authorities and its surgical staff have now taken over this work so that children whom the school nurses take there for treatment now receive service and after treatment equal in skill to that which they could receive in Boston and without the discomfort of the going to and from that city.

Evening Schools.

The evening school problem remains as complex, as difficult of solution and as great a challenge as ever. The work of the past year has not differed from that of the years immediately preceding in the effort and energy put forth to develop a well-rounded system. It should be frankly admitted that while the results of the individual schools have been admirable they are only at the surface of the possibilities which lie below.

Most important of all our work are the schools for foreigners. Every city and every citizen should recognize that truth.

With so large an annual influx of non-English-speaking people as came to our cities just before the European war, an influx which may be resumed at its conclusion, these communities must either make a strenuous effort to Americanize the newcomers or be themselves gradually de-Americanized. Of course, there will be all stages between these two extremes, but the danger of de-Americanization is too great to be overlooked. For that reason the School Department has made every effort to draw the illiterate to evening school and to keep him there. It is a most difficult matter to overcome the natural inertia of the immigrant. The widespread publicity of opportunities, the encouragement of his fellow countrymen who have already succeeded, the constant sympathy and untiring efforts of some of our best-trained teachers are all employed to this end.

On the other hand are the attractions of the social clubrooms and the fellowship of his friends, the natural fatigue of the individual after a long day in the shipyard or the quarry and the interruptions occasioned by the very frequent demands of night work and over-time.

In view of all these handicaps, the evening schools have done well to secure so large an enrollment as they have and to maintain the attend-

ance. It is quite clear, however, that the State as a whole must take up the problem of immigrant education before much greater progress will be made.

Three buildings have been opened for immigrant education the past year, the Adams, Willard and Washington. Each school has, by reason of its location, ministered in the main to a distinct racial group. In each school the problems have been peculiar to that school and group and have been attacked in different ways. Since the European war the enrollment and attendance have shown a regular decrease as they have in all other cities. The following figures indicate the conditions of attendance during the school year of 1916-1917.

Evening School Attendance.

	<i>Enrollment</i>	<i>Average Attendance</i>	<i>Aggregate Attendance</i>
Schools for citizenship.....	676	206	14,870
School for drawing.....	40	24	976
School for commercial and civil service work	89	50.4	2,017

In the High School building, beside carrying on the general free-hand and mechanical drawing courses which are required by law, we have attempted each year to meet such general academic needs as manifest themselves. What we should work for and endeavor to obtain is an evening High School providing instruction in a number of the day High School subjects for such pupils as are competent to pursue them. As a matter of fact, there has been almost no demand for instruction of this nature up to the present time and the only classes which have been organized are the elementary commercial classes, giving instruction in arithmetic, business forms, spelling, penmanship and simple bookkeeping, and a civil service class which provides work of a rather elementary nature. These classes vary very little from year to year in enrollment or regularity of attendance and within their scope do excellent work for which there is considerable demand.

This year for the first time an evening gymnasium class for women was opened, with meetings each week and with an excellent attendance.

The High School.

While the report of Mr. Collins, the Head Master of the High School, records in detail the year's happenings and progress, some comment should be added on the general condition and the future of the school.

There has never been a time within my knowledge of the school when it was doing better and more effective work with so little friction or wasted energy. Notwithstanding an enrollment and general attendance which fills every corner of the building, every department of the school carries on its work smoothly and harmoniously.

For a number of years the High School has maintained a most creditable reputation as to the preparation and later record of those pupils whom it has fitted either for college examination or certificate. The record of its graduates whom it sends on to normal schools is becoming better with each succeeding class and those departments which have no connection with preparatory work are being conducted in a sensible, practical manner.

The High School of this city is in every sense of the word a people's school. It has had of recent years and does now have a very high percentage of the total school population on its rolls and it has never been dominated by the college preparatory idea. In recent years, too, we have greatly reduced the amount of elimination of pupils in the first years of the High School course, knitting the work more firmly to the work of the elementary school.

The natural consequence has been a marked yearly increase in enrollment and attendance to such a degree that immediate consideration should be given to the providing of new accommodations.

This problem is now the most pressing and most important one before the School Committee and one which should be immediately considered.

The disposition which is to be made of the Adams Academy Fund, a matter which is now in the hands of the court, will have some bearing on the whole question and it is hoped that with the adjustment of this the city may proceed to consider new building plans as soon as possible. The report of the Head Master of the High School follows.

To Mr. Albert L. Barbour,
Superintendent of Schools:

I herewith submit to you my fifth annual report. As in former years, I have to make note of the considerable increase in the membership of the school, but this year the larger number has brought a really alarming condition. If the great demand for boys and girls in mercantile and manufacturing establishments had not somewhat relieved the situation, we should have been helpless in our attempt to make the present accommodations meet the demands of our numbers. The floor of our assembly hall is used most of the week for recitations and the balcony is used all the time for a library. It will be absolutely impossible to carry on school another year under present methods. The work of teachers and pupils will have to be arranged in such a way that the school will have a morning session for part and an afternoon session for the rest. Below are the statistics for recent years.

	1916	1915	1914
Whole number enrolled	1116	1055	987
Whole number at date	1038	997	933

It was found to be desirable to make a few changes and additions to the program of studies at the beginning of the present year. The time given to Ancient and United States History was extended a little in order to better meet the requirements in those subjects. For several reasons it was thought wise to change the system of stenography taught in the school from the Chandler to a Pitmanic system.

There has been a decided movement throughout the State toward connecting the pupils of our schools more closely with the life of the community in which they live. Desiring to have our part in this movement, we have established a course in Community Civics for our entering classes in order that they may become familiar with the aims and purposes of government in our own and similar communities.

In keeping with our desire to broaden the scope of instruction in order to develop as widely as possible the talents of our young people, there have been established several courses in the Theory of Music. Harmony is offered for Freshmen and Sophomores and Musical Appreciation for Juniors and Seniors. In addition, for the present year, the young women

of the Senior class expecting to enter normal schools have been given a course in Harmony especially designed to be of assistance to them in their training for the teaching profession. These courses in music have been very popular and already give evidence of bearing fruit in the way of added ability among the pupils to appreciate good music and even to produce original compositions of some merit.

The school had its part during the year in the celebration of the Shakespearcan Tercentenary, which movement was general throughout the English-speaking world. An interesting program consisting of parts of Shakespeare's plays and old English songs and dances was prepared and this performance was given twice; once for the pupils of the school during a regular session and again on an evening later when the parents were invited to enjoy it. The costumes, scenery and furniture for this performance, it is worth while to note, were made by pupils in various departments, while the music and dancing were from regular work of the school.

By means of a fund at its disposal, the school was able to purchase an excellent Hume concert grand piano to use in place of the piano which has done service in the school for many years. The fund also sufficed to provide a Victrola, which has furnished much enjoyment to the school and has been of valuable assistance in the music courses previously mentioned. The graduating class of 1916 generously donated the profits of *The Golden Rod*, the school paper, to purchase records for the Victrola and the German Club has recently given additional records. Because of these gifts we have a fairly good equipment of very useful records and by means of these, together with occasional additions, we can set before the pupils examples of the best there is in music.

One of the most beautiful gifts that has come to us during the year, and one which we have highly appreciated, is a large silk parade flag fittingly mounted and with a suitably engraved plate, which was presented by the Massachusetts Department of the Women's Relief Corps through the influence of friends in the local Corps. The Alumni Association has continued its good work by adding to our library an attractively bound set of Kipling's works. The Quincy Women's Club, also, desiring to do something for the school, appropriated a substantial sum of money which was given to a young woman of the last graduating class to assist her in securing a higher education. I mention these various gifts as an indication of the growing interest in the school and of a desire on the part of many organizations to have a share in promoting the welfare of our young men and women.

In closing this report I wish to say, on behalf of the teachers in the school and myself, that we fully realize that in the School Committee and yourself we have real friends who are willing not only to share our burdens, but at all times to give encouragement and to show real appreciation of efforts and ideals.

Respectfully submitted,

ERNEST L. COLLINS, *Head Master.*

Conclusion.

While each of the recent years has witnessed marked changes and additions to the Quincy school system, the educational world is moving forward so rapidly and the school population is increasing to such a degree that new needs are constantly pressing.

Beside the new High School accommodations which we now so badly need, we should continue to enlarge and broaden the scope of our industrial classes, we should seek to strengthen our system on the side of the maintenance of health, which can best be done by the employment of a medical officer on full time. The School Committee of 1917 will include in its powers the care of its school buildings and this should lead to better kept buildings than we have previously had.

With the opening of the new buildings there should come kindergartens, classes for sub-normal or atypical children, open-air classes for those physically defective and such other differentiations as investigation, experiment and the best practice have indicated as desirable and necessary to enable the public schools to reach all the children of all the people. Past experience with the sentiment of the people of this city assures me that all these good things will come about in due season.

With the knowledge that the present School Committee goes out of office with the adoption of a revised charter, I wish as Superintendent of Schools to bear witness to the wholehearted, disinterested and valuable service that the School Committees have given Quincy during the years that I have been associated with them. In professional matters the Superintendent has invariably been accorded unqualified support. All administrative matters and all measures involving the expenditure of public funds have been decided on a broad, businesslike basis with a scrupulous care to secure economy. On all matters wherein the public may have had differences of opinion, all sides have been heard with patience and intelligence, and decisions have been made without bias. In a word, the service of Quincy School Committees has typified representative government at its best.

It is a great pleasure for me to bear witness to this service and to acknowledge this support.

Such service and support, supplemented by a harmonious and efficient teaching corps, should inspire and encourage a broad and helpful community attitude toward public school education.

Respectfully submitted,
ALBERT L. BARBOUR, *Superintendent.*

STATE-AIDED INDUSTRIAL SCHOOLS.

The past year has shown as marked progress in the line of industrial education as the years immediately preceding.

The Independent Industrial School for Boys has added one new trade, the machinists', to its list and has equipped one room in its building with a considerable amount of machinery for this trade. One additional instructor has been required in the electrical department. All departments at the school have had all the work that they have been able to attend to in productive lines and the amount of work which has been done by some departments in repairs for the city amounts to a very large sum. In common with all similar schools of the State, it has been found that the present period of easy employment and high wages has had a tendency to reduce the number of boys seeking trade training, as the lure of easy money has over-shadowed the larger aim. Consequently, for the first time since its organization, the school has been without a waiting list and a greater number of boys than usual have been taken as tuition pupils from surrounding towns.

Mr. Spofford's report will give the details of the work of the school.

In September a Home-making School was organized in the Arnold house on Coddington Street. This school offers a two years' intensive course in those subjects which go to make a woman efficient in the home. Stress will be laid on cooking, sewing, dressmaking, millinery, laundry, care of children and care of the sick. Judged by the four months the school has been organized, there will be a steady yearly demand for training of this type. In order that the school may properly accommodate a second-year class, the building should receive an addition during the coming summer of sufficient size to provide a larger kitchen, one classroom and an adequate toilet room. The work of this school is supplemented by a considerable amount of home visiting on the part of the teachers in order to see that the routine work of the school is being properly correlated and to insure that ample opportunity is provided to put the knowledge gained in school to actual account in the home. Miss Elizabeth Douglas, who has been for some years in charge of the cooking at the High School and who established the lunch counter at that school, was appointed Director of the Home-making School when it opened, and her report, together with the course of study at the school, is appended to this report.

The evening industrial classes have been no less successful or well attended than in previous years. Occasionally the demand for one type of evening trade instruction may fall off as we approach what may be called a saturation point, but another demand rises to fill its place. For instance, there was no demand this year for classes for electricians or for carpenters, but, on the other hand, classes were organized in shop mathematics and in layout work for coppersmiths.

Classes for women in dressmaking and millinery were opened in September in both the High and the Willard Schools. A table to be found in the appendix shows how successful these classes have been.

ALBERT L. BARBOUR.

To Mr. Albert L. Barbour,

Superintendent of Schools:

I have the honor and pleasure to submit herewith my fifth annual report of the work in the Quincy Industrial School.

The Full-Time School.

The Full-Time School began the year with seventy pupils enrolled in the woodworking, electrical and sheet metal trades. This number remained about the same until the school opened in September, when, on account of the abnormal business conditions and the exceedingly high cost of living, many of the boys who had secured work for the summer vacation did not return to school.

The boys in the woodworking department began work on the drawings and designs for the furniture for the Home Making School in January, 1916, and when school closed for the summer vacation they had completed the sewing tables, cutting-out tables, blackboards, umbrella racks, coat racks, and the following quartered oak furniture: Dressing tables, chiffoniers, bedsteads, library table, sideboard, principal's desk, etc. All of this material may be seen at the Home Making School.

The sheet metal department designed and made a large refrigerator, sheet metal kitchen cabinet and first-aid cabinet for the Home-making School; also installed a new furnace and made all the necessary new furnace pipes.

Our electrical department installed all the electric wiring for lights, lighting fixtures and bell systems in the Home Making School.

In addition to this work done for the Home-making School, the various departments have co-operated with the other city departments and have made such repairs as have been necessary in all of the school buildings in so far as our trade departments would permit.

The sheet metal department has made a large number of sheet metal products which have been sold to local dealers and to the public in general.

The woodworking department has made several pieces of furniture on order from residents of Quincy and Weymouth. This department has orders on hand from people outside of Quincy who have seen the furniture in the Home Making School.

The pupils of the school are granted a ten per cent commission on all orders which they secure. This has proven to be of considerable assistance to some of the boys.

Most of the machinery for the machine shop arrived late in May and was installed by the co-operative boys from the Gear Works during the month of June. The electric wiring for the machine shop was done by the pupils in our electrical department, so that when school opened in September everything was in readiness for the machines to be started. Mr. Grover C. Russell was appointed as instructor in the machine department.

Mr. Matthew S. Nicoll was appointed as instructor in the woodworking department to succeed Mr. Hugh H. Marshall, who resigned early in the summer.

Mr. Walter F. Perry was appointed as instructor in academic and electrical subjects, on account of the rigid rules of the State Board of Education relative to productive work, and also the new law which requires that a licensed electrician be on the job with pupils when installing any work for electric lighting or power purposes.

The products of all departments have been of exceedingly high stand-

ard and great credit should be given to the boys and the instructors for the gratifying results obtained. The actual cash received from all departments for the past year was \$945.77. Bills unpaid from the Commissioner of Public Works were \$199.10.

The Co-operative School.

The Co-operative School started the year with ten pupils enrolled from the Boston Gear Works and the Couch Telephone Company. The work has been more satisfactory from the industries standpoint this year than in the past, on account of the new schedule of alternating, which was adopted the latter part of the year preceding, namely, the alternating between the Boston Gear Works is on the three-months-about basis, and between the Telephone Company is on the two-weeks-about basis.

We have endeavored to give Quincy boys opportunity for admission to this school in preference to out-of-town pupils, but in many cases the applicant wanted either the electrical or machine trade and refused to accept any of the other trades taught, although the other trades offer fully as good a future as the trade selected.

In closing, I wish to express my sincere appreciation and thanks to you for your helpful advice and co-operation in the past, and to thank my instructors for the hearty co-operation which they have given me.

I would also thank the Boston Gear Works and the Couch Telephone Company for their co-operation in the past year.

Respectfully submitted,

J. GOULD SPOFFORD, *Principal.*

Home Making School, Quincy, Mass.

January 1, 1917.

To Mr. Albert L. Barbour,

Superintendent of Schools.

I have the honor to submit herewith the first report of the Quincy Home Making School.

School began on September 5 in the Zenas Arnold house on Coddington Street with a membership of twenty-four, which has since increased to twenty-seven. The house had been furnished not as a school, but as a home. The boys of the Industrial School had already made the furniture, wired for electric lights and installed a larger furnace. In their turn the girls began immediately on the household sewing, so by the first of October the house had been completely turned into a home.

The aim of the school is to train girls above the age of fourteen to become efficient and capable home-makers and also to develop in them sufficient skill to carry on remunerative work, either within the home or in the trades which have been taken from the home. That the work may not be too narrow, in addition to the trade work and correlated subjects, the pupils spend twenty per cent of the school time on academic subjects of cultural value.

All of the practical subjects are being taught by specialists in their own line of work; a graduate nurse teaching the home nursing, a worker from the trade itself teaching the millinery.

In order that the girls may gain speed, manipulation skill and confidence, home project work is required. This is the assignment of home lessons in the practical work, records being kept of the time spent and result of the work, and credit being given for each project. This home work is proving valuable, it being the means of bringing the school closer to the home. The success of this is due to the fine spirit of co-operation shown by the mothers.

Owing to the large amount of illness in the fall, the home visiting by the teachers did not begin at once. Up to date there have been made 115 calls for the purpose of seeing the girls at work in their own homes.

The classes in cooking not only take charge of the cooking and serving of the school lunches but, in addition, in order that they may have the experience in serving a family meal, they cook and serve each day a lunch for six of the teachers of a near-by school.

The classes in sewing have been busy both at home and at school making sewing and cooking uniforms, hemming sheets, pillowcases, tablecloths, napkins and towels, and making many other things necessary for the starting of the home.

At Thanksgiving time each girls wore home a simple velvet hat which she had made herself, and the girls are now making all kinds of hat trimmings.

No course which we give is more popular with the girls than the home nursing. Many of the pupils have already been of assistance at home, putting into practice the instruction which they have received at school.

As you do not come in touch with the individual parents, I take great pleasure in passing on to you and the School Committee the gratitude expressed by them for making possible for the girls of Quincy this kind of a school.

Respectfully submitted,

ELIZABETH M. DOUGLAS.

REPORT OF THE SUPERINTENDENT.

Mr. Chairman and Gentlemen:

I submit herewith my eighth report as the superintendent of Woodward Institute.

The past year has witnessed more changes in the teaching corps of the school than have taken place in many years.

Miss Mary Dinegan, who has been a most faithful and efficient teacher of English and Latin, resigned in June, to marry.

Miss C. Louise Steele, who for eight years has taught English and History in a very capable manner, was obliged on account of ill-health to resign at the same time.

Both these teachers because of their long association with the school, their teaching ability and pleasing personality, will be gratefully remembered by hundreds of the young women of the city.

The part-time teacher of cooking, Miss Elizabeth Douglas, discontinued her work at the same time, as she assumed the principalship of the Home Making School in September.

Apparently, so far as this brief time enables us to judge, we have been very fortunate in the selection of successors to these teachers.

Miss Janet MacKnight, who comes to Woodward Institute to take charge of the English department, is a graduate of Tufts College and has had successful experience in public high school work.

Miss Marguerite Mathews, who succeeds Miss Steele as teacher of English and History, is a graduate of Mt. Holyoke, with a Master's degree from Brown and experience in the public schools of Providence.

Miss Julia Leamy, who takes charge of the instruction in Cooking, has similar work in the Quincy High School and is well trained and experienced in her special field.

These changes of teachers suggest that we should never lose sight of the fact that the efficiency of a school is absolutely dependent upon the ability of its teaching corps, its unity as a working force and its devotion to the profession in which it is engaged. No school can be more efficient than the sum total of the teaching ability at its disposal. No department in the school, no subject of instruction can be more successful than its teacher. It follows, then, that in any school the unfortunate choice of a teacher unskilled in the science and art of teaching reduces the success of that school by a degree which may be estimated with some approach to exactness. Fine education, social standing, personal charm, local residence, all these are excellent; most of them in fact are pre-requisite. But beyond these there must be the training and the successful experience in the profession which teaching has now become.

It may readily be seen, then, how vital is the responsibility of selecting teachers of known capacity when vacancies arise, with what anxiety the development of new teachers is watched and with what satisfaction successful teaching is noted.

The enrollment in Woodward Institute this year is slightly below that of last year, very largely because of the fact that eligible girls in the

graduating classes of the grammar schools are being made definitely aware each year of the particular courses in which Woodward Institute specializes and are also being informed of the standing in scholarship which will not only be expected, but insisted upon if they are to remain in the school.

As a result the number of girls going from Woodward to normal school or college is increasing from year to year and already exceeds the number going from the large public high school in this city. There is every indication that this tendency will increase rather than diminish. Such a trend will bring a steadily rising level of good scholarship which ultimately should be the distinguishing characteristic of the school, a distinction to be sought for and cherished.

The building and grounds have as usual been kept in sound repair and the equipment of the school is ample for its purpose.

The institute is indebted to the Class of 1919 for the picture, "Arch of Constantine," which has been presented to the school.

Respectfully submitted,

ALBERT L. BARBOUR.
